PHẦN 2 - DẠNG 1: GIẢI QUYẾT TÌNH HUỐNG TRONG GIAO TIẾP - SITUATIONAL COMMUNICATION

1. Giao tiếp theo tình huống (Situational Expression)

1. You are currently part of a scientific team conducting fieldwork in the mountains. However, your progress has frequently been disrupted by poor weather conditions. You are now worried that you may not complete the work on time. Since this cannot be permitted, you tell your friends:

A I believe it doesn't seem to be rational to continue with our work.

B I'm afraid we're falling behind schedule due to the bad weather, so we need to put in much more effort.

C Despite the bad weather, the work is proceeding as originally planned.

D The unfavorable weather conditions have had minimal impact on our work.

2. During a school exam, the student next to you is copying your answers. You're frustrated by this behavior but you don't want to hurt your friend. You say politely:

A Can you tell me what you don't understand?

B Could you please stop looking at my papers and get involved in your own exam?

C You are so stupid to do this. Stop doing this right now.

D You are not smart enough to understand what I mean.

3. You want to go to the movies with your friend, but she has a project to complete and doesn't have time. You insist and persuade her in the end. While watching the film, you realize the plot is predictable and the acting is poor. You think you should apologize and say:

A I know the film isn't good, but it's still better to be here together than at home, right?

B I rarely go to the cinema, so don't blame me for this choice.

C I think the story is actually quite good, while the acting is a bit amateurish.

D I'm really sorry, but honestly, if I had known the film would be this bad, I wouldn't have insisted you come.

4. You've been waiting in a long line at the ticket counter on a very hot day. Suddenly a big man pushes you and stands in front of you in line. You really get very furious and you approach the man and say to him in the loudest and angriest voice that you can manage:

A Where on earth did you learn such kind of behavior?

B Is this the right line for paying bills?

C Excuse me, could you please let me go ahead of you?

D That really wasn't a very nice thing you did back there, you know.

5. You recently lost your mobile phone in the school dormitory. While the phone itself isn't a big deal to you, its list of phone numbers is important. So, you put up a notice on the wall that says:

A I've lost my mobile phone. Please let me know if you find it.

B I found a mobile phone on my way home. Contact me if you want to claim it.

C I've lost my mobile phone and urgently need the numbers in it. A generous reward will be given to anyone who brings the numbers to room 732.

D I have just lost a very expensive mobile phone. It was a gift from my mother so I treasure it very much. Please return it to room 732.

6. A friend has asked you to look after her dog while she's away, but the dog is quite spoiled and noisy. You don't want to accept but you don't want to hurt your friend by refusing her. Trying to hide your reluctance, you say:

A I'm afraid I don't have the patience to take care of it.

B You know I have a husky at home, and it might not get along with your dog.

C I really want to help you out, but do you have any tips for keeping that noisy dog quiet?

D You know how busy I am. Is it possible to postpone your trip for a bit?

7. You've scheduled a job interview with the manager of a reputable company. When you arrive there, you come to the receptionist and politely state the reason for your visit:

A Excuse me, I can't find the room for the interview.

B Excuse me. Do you know where the other candidates are?

C Good morning. I'd like to confirm if this is the right place for my interview.

D Good morning. I'm Jane Foster, and I'm here for a job interview with Mr. Walcott.

8. You are going to the movies with some of your friends who are the most popular students at school. You have an extra invitation and want to offer it to a shy, introverted girl who is the new transfer student. But your friends are against this idea. To persuade them, you say:

A Why don't we give her a chance? Perhaps she can adapt to the atmosphere.

B Shouldn't we invite this new girl as well?

C What's the problem? Why do you always disagree with me?

D How about I just give my ticket to the new girl? I really don't want to go.

9. After some hours of studying with you, your student finally managed to understand even the most difficult structures in English. You want to compliment him. You say:

A I don't understand why it takes you so long to understand these basic things!

B Well done Michael. These were really difficult grammatical points but you got them all.

C After so many hours with me, it is normal that you've learned English well.

D You have no problem but reading. And you have to study much more to achieve it.

10. Since your daughter is eager to have a pet, you decide to buy her one. You choose a Maine Coon cat at a pet shop but after a moment's consideration, you change your mind about buying a cat, and tell the saleswoman politely:

A I really love cats, especially the beautiful ones, but I need to look for something more affordable.

B Do you have any Somali cats? I think they're much prettier than this one.

C It may not be a good idea after all; she might lose interest in a few weeks.

D Is there another pet shop nearby where I can find some different ones?

11. One of your colleagues is hosting a party today, and you plan to attend. Your mother is curious if your girlfriend, Linda, will be there too. Although you're annoyed with Linda, you have a hunch that she might show up at the party tonight. You tell your mother:

A I'm sure she'll come to the party, and we'll have a great time.

B I'm not sure about that either, but I think I'll unlikely see her there.

C I don't really care, and she probably won't come.

D Mom, I think she'll be there. After all, she cares about me.

12. Your sister is currently taking a Maths course and has just completed a test. Unfortunately, she got a terrible score, so she has been feeling very sad since the time she received the results. As an elderly you think that it's not the end and try to comfort her by saying:

A Don't worry about it anymore. Many others didn't do well either.

B This isn't the first time you've gotten such a low score.

C Why are you getting such poor marks?

D That is not the end. You may be given a make-up exam.

13. As a university student in the Fundamental Science faculty, you aspire to become a great scientist and win a Nobel Prize one day. However, when you get a low mark on one of your exams, your professor tells you that you will never achieve your dream of becoming a great scientist. You respond to him with determination:

A I'm very set on becoming a great scientist, and nothing you say can change that.

B I've already made up my mind to leave college, so there's no need to worry!

C I am determined to pursue this dream no matter how difficult it is.

D You're right; I guess I should not pursue my dreams!

14. After losing his job, your friend Jack is looking for a new job. However, he doesn't dare to apply for it. You want to encourage him and give him some confidence to arrange some job interviews, so you say:

A I think many people have already had interviews for good positions.

B While you're hesitating, opportunities won't wait for you.

C You don't stand much of a chance, but why not try for a more moderate job?

D It seems to me you've got many right qualifications. Why don't you apply for a job? Even if you're not accepted there's no harm in doing so

15. On your birthday, your friend bought you a dress. You really like the dress but it's too big. You decide to take it back to the store and politely ask for an exchange. You say:

A This is a nice dress, but it doesn't fit, so I'd like to exchange it for a different type.

B This dress is too big for my friend; could I get a different one, please?

C Do you think this dress is too large for me? If it is, I'd like to exchange it.

D Do you have this dress in a smaller size? I would like to exchange it, please.

16. You are paying for what you've bought in a shop and notice that the shop assistant has mistakenly counted the change, giving you more than you should receive. Even though it's to your advantage, you think you must warn him. So you stop him and say:

A You've overcharged me, please correct your mistake.

B I'm sorry, but I think you charged me for five items when I only have four.

C Excuse me, but this shirt costs 4.90 pounds, not 5.90.

D Hey! Why don't you pay more attention to what you're doing? You're being paid for this!

17. You're visiting your Literature teacher for the first time and notice his library is filled with around a hundred novels by many famous authors. To express your surprise, you say:

A You must really enjoy reading.

B I wish I had as many books as you do.

C What an impressive collection of books!

D Wow, did you borrow all these books or are they yours?

18. Your boss has given you a new position that demands more effort. You don't believe it will benefit your current situation, and you're not keen on working longer hours because of your age. You politely decline the offer:

A I hope you won't be upset if I turn down this offer.

B I'm in two minds about whether I should accept it or not.

C I'm really sorry, but I don't think I'll be able to handle this new position as I don't feel energetic enough.

D I wonder why you chose me for this position?

19. Mia, your roommate, borrowed your shoes without asking your permission. When she returned them, they were dirtier than usual. Feeling angry, you want to warn her, so you say:

A How could you do that?

B Don't worry; there's no need to be upset.

C Sorry, but why did you borrow my shoes without asking?

D Your irresponsible behavior has irritated me a lot, so please don't do this again.

20. Sam is considering buying your car. Since he's an old friend, you'd like to give him the first chance, but he's been hesitating about it for over ten days, and you're losing patience because you want to wrap up the sale. You tell him quite openly:

A I'd like you to have the car, but given my financial situation, I'll have to sell it to the highest bidder.

B The car isn't in the best condition, so it might be better for you to look at other options.

C There are other people interested in buying the car, so please make a decision by Thursday at the latest.

D You can use my car for a few days, but I'll need it back by the weekend.

21. A friend is concerned about his son because he's been performing poorly at school. Your friend's approach seems rather strict, and you feel that he might be too hard on the boy. Hesitantly, you suggest:

A It's serious. You'll have to make him work harder.

B Perhaps you're putting too much pressure on him. He's just at the age that reacts badly to pressure.

C Don't change your approach; eventually, he'll give in.

D You are too strict, it is not good for your child.

22. You promised to meet a friend tonight, but unexpectedly your boss is going abroad, and you're requested to give him a lift to the airport. You call your friend and say:

A I'm sorry, but we can't meet tonight because I'll be going abroad.

B I'm sorry, but my boss needs to meet me at the airport today

C I'm sorry for canceling our plans, but let's try to meet later tonight.

D Sorry for breaking my promise to meet tonight, but I must take my boss to the airport.

23. Your daughter has just moved to a new school which she must attend at least for a semester. On her first day at school, she phoned you to say she feels very lonely because she hasn't got any friends. You want to comfort her, so you say:

A Girls, don't cry, my brave daughter. Stay strong and keep your chin up.

B Have you tried talking to anyone yet?

C The first days are always tough. Don't worry; you'll make friends over time. I believe in you.

D If you really don't like that school, we can change it right away, my dear.

24. Your niece has been in a long-term relationship with a boy, but your uncle disapproves of him and their relationship. Now, your niece and her boyfriend are meeting in secret, and she seeks your advice on their situation. You want to guide her in the right direction, you say:

A Meeting in secret will only complicate things further, so talk to your father and find out why he doesn't like your boyfriend.

B Keep it up as you have been; I admire your ability to keep your love a secret.

C You're worrying too much. Try to take a break and relax for a few days.

D How about taking a holiday to find some peace?

25. Your sister has been listening to her favorite song in her room for almost 2 hours. She turned up the volume to the max to enjoy the song. You can't stand the noise anymore and you're worried about the possible bad reactions of the neighbors. So you go into her room and sarcastically tell her:

A Our music tastes are totally different from each other, isn't it?

B If you go on listening like that, our neighbors will be thankful to us for this free disco party.

C I really don't get how you can enjoy yourself listening to this awful music.

D Keep listening to music loudly when you get in a bad mood. It helps you relax.

26. You and your friend are shopping in a department store. There is a shop assistant who follows you everywhere you go, making it difficult for you to discuss prices comfortably. To express your dissatisfaction, you say ironically:

A Following customers around like this really encourages them to buy more, doesn't it?

B Can we find every type of product here?

C We've been searching for a pair of shoes.

D We come here frequently; can you offer us a discount?

27. Feeling unfairly criticized for negligence, you believe you have every right to protest. You say:

A You've no right to shout at people like that, no matter what they've done.

B Agreed! Perhaps, there is evidence of carelessness? But whose? No one has the right to blame me.

C If you follow the instructions carefully, we won't have these issues.

D Let's stop accusing each other and get down to putting things right.

28. A friend of yours is stressed because he is under a lot of pressure at work. You want to help him unwind for at least one evening, so you've planned a night out with mutual friends and invite him to join. You want the invitation to seem casual but be tempting. You say:

A You should really meet these people; they work in the same field as you do.

B How about joining us? It's all people you know so you can relax and be yourself.

C I'd prefer not to go alone; would you come along with me?

D You seem really tense all the time. You need to take a break or you might end up getting sick. You have to come with us.

2. Câu hỏi suy luận (Inference questions)

1. Marry: I really wanna take ancient history, but I already have a heavy course load this spring.

John: The summer session could be a good option, especially since you'll be working on campus then.

What does John recommend Marry do?

A Work in the ancient history department

B Add another course this spring

C Find a summer job

D Enroll in an ancient history course during the summer

2. Tim: Professor Smith, I would like to redo the experiment from our last class. Is there any chance I could access the lab this weekend?

Professor Smith: The lab will be locked, but you can get the key from the security office. Just be sure to return it when you're done.

What does Professor Smith imply about Tim?

A He should do his work at home.

B He can use the lab on the weekend.

C He has to conduct the experiment again next week.

D He forgot to give the key back to security.

3. Terry: That's an awesome bike! Where did you get it?

Linda: You know that sporting goods store on Washington Street? They've been having tremendous sales all spring!

What does Linda imply?

A The bike is too great for her.

B She got the bike at a good price.

C Terry was unaware of the store on Washington Street.

D She hasn't used her bike at all this spring.

4. Philip: How much did your plane ticket cost?

Laura: It was more than I could actually afford-I had to dip into my savings.

What does Laura imply?

A She didn't purchase the ticket.

B The ticket was pricey.

C She doesn't know how much the ticket cost.

D There are still some tickets available.

5. Wilson: Professor Iris, we experienced a power outage in my home last night, so I wasn't able to finish my paper. Could I submit it tomorrow?

Professor Iris: I understand that unexpected situations can arise, but I do not allow any exceptions. I stated that clearly during the first class... and the library was open until midnight... What does the professor imply?

A She will extend the deadline for the paper.

B She has already made an exception for this student.

C She does not accept late submissions.

D She cannot meet with the student in the library.

6. Mia: I'm considering moving off-campus next semester, but since I don't have a car, I need to find a place nearby. Do you have any suggestions?

Liam: Interestingly, the people living downstairs from me are moving out next month, so their apartment may be available, and it's just a block away from the university. If you're interested, I can check on it for you.

What can be inferred about Liam?

A He lives far from the university.

B He is planning to move next month.

C He prefers to live on campus.

D He might be able to assist Mia.

7. John: That movie was terrible! A total waste of time!

Lydia: You can say that again!

What does Lydia imply?

A She agrees with John.

B She wants to watch the movie again.

C She hasn't seen the film.

D She doesn't understand what John is saying.

8. Joana: Wow, you look really happy today. What's your secret?

Jack: Dunno. I suppose some mornings you just wake up feeling great, and other mornings you don't.

What does Jack mean?

A He does not like to wake up early in the morning.

B The woman seems unusually curious.

C There isn't a specific reason for his good mood.

D He wasn't in a good mood when he woke up.

9. Michael: I'll think twice about taking a biology class next year. There isn't a single good teacher in the whole biology department.

Eira: Remember, that's what you said last semester about the English department. And I'm very glad I didn't pay any attention to what you said.

What does Eira imply?

A She took a biology class last year.

B She doesn't trust Michael's opinion.

C She is unlikely to take any biology classes.

D She was not fond of her English teacher.

10. Maria: I know we're supposed to meet at four in the school yard, but something unexpected

came up. Would you mind moving it to five?

Tom: Not at all. My schedule is quite flexible.

What does Tom mean?

A He is very busy right now.

B He needs to check his schedule.

C He can meet Maria at five o'clock.

D He prefers to meet Maria another time.

11. Stella: Can you believe it? A 30-page term paper and a final exam. What does Professor

Johnson think? That we don't have any classes but his?

Pedro: Hold on. I'm pretty sure he mentioned it was one or the other.

What does Pedro imply?

A The course is too challenging.

B The professor changed his mind.

C The final exam has been canceled.

D The woman misunderstood what the professor said.

12. Sandra: I'm really happy I got that athletic scholarship, but I'm embarrassed by the big fuss al my friends are making.

Michael: Well it is quite an accomplishment. Of course your friends are happy for you!

What does Michael imply?

A Sandra deserves the praise.

B Sandra should tell her friends how she feels.

Sandra's friends are unaware of the scholarship.

D Sandra should consider applying for a scholarship.

13. Lisa: There's a big crowd at the health center today. I'm surprised that so many people want to get a free blood pressure test.

Teddy: Now that you mention it, I haven't had mine checked in a while. Guess I'll go get in line... What does Teddy mean?

A He visited the health center earlier today.

B He plans to have his blood pressure checked.

C He doesn't have time to wait in line today.

D He isn't worried about his blood pressure.

14. Charlie: I don't know what I was thinking of when I gave you those directions.

Emma: Oh, don't worry about it. I arrived before the conference started. I didn't have to drive that much out of my way.

What can be inferred from this conversation?

A Charlie's directions were not very good.

B Emma forgot to take Charlie's directions with her.

C Emma was not able to reach the conference.

D The conference was not very engaging.

15. Ethan: A florist advised me to cut a bit off the stems before placing flowers in water to keep them fresh. I wonder if that actually works...

Emily: I heard the same thing, and the bouquet I had lasted longer. BAnyway, it can't hurt, can it?

What does Emily imply?

A Ethan should take the florist's advice.

B Ethan should visit some more florists.

C She purchased flowers from the same florist.

D Cutting the stems doesn't help flowers last longer.

16. William: The library's closed already? It's only four o'clock.

Aimee: I guess with so few students around in the summer there isn't the demand.

What does Aimee mean?

A She did not know about the library's schedule in the summer.

B The library has only a few staff members during the summer.

C The library is closed in the summer.

D Not many people use the library in the summer.

17. Jasmine: There's no way I'll be ready to give my speech tomorrow.

Brian: You'd better get ready. It plays a significant part of your grade for the course.

What does Brian imply?

A He will assist Jasmine in preparing her speech.

B Jasmine should take her speech preparation seriously.

C Jasmine is not confident about speaking in the class.

D The speech doesn't affect the final grade for the course.

18. Tom: There is so much stress on our accounting department this time of year. How do you manage to stay so calm?

Mary: Well, the truth is, I only look like I've got it all under control.

What does Mary mean?

A She disagrees that it is a stressful period.

B She does not feel as calm as she seems.

C She admires Tom's ability to stay calm.

D She will help Tom to reduce his stress.

19. Chandra: I just visited the university's bookshop to buy my books for next semester, but there were around a hundred people waiting in line.

Michael: You know, you can usually order most textbooks online... and sometimes there's a discount.

What does Michael imply?

A He arrived at the bookstore early.

B The line at the bookstore moves slowly.

C Books are less expensive at the bookstore than online.

D Chandra doesn't have to wait in line at the bookshop.

20. Dylan: I just received an offer for that teaching position in Japan.

Julia: You've been talking about this for ages! I'm so excited for you.

What does Julia imply Dylan should do?

A Accept the job offer.

B Discuss the job offer with a friend.

C Look for a job that is not so far away.

D Keep his current job.

21. Max: It doesn't make sense for us to go home for spring vacation right now.

Jane: Especially since we're graduating in May.

What does Jane mean?

A She won't be going home for spring vacation.

B She hasn't had a vacation in a long time.

C She doesn't intend to graduate.

D She doesn't want to go home after graduating in May.

22. Selena: Are you ready for this?

Kane: Should be. I've been cramming for the past three days.

What does Kane mean?

A He should have studied more.

B He is feeling quite anxious.

C He has been studying a lot.

D He needs a few more days to prepare.

23. Tom: You're in my computer science class, right?

Sarah: Yes, but I'm not majoring in computer science.

Tom: So, what do you think of Professor Collins?

Sarah: I think he's a great person, but the class just turns me off.

What does Sarah mean?

A She does not like the class.

B Her classmates are wonderful.

C The professor isn't very nice.

D The class is engaging.

24. Jane: Are you still studying? It's two o'clock in the morning.

Stephen: I know. I just can't seem to get caught up.

What does Stephen imply?

A He won't be able to finish the work in time.

B He didn't realize what time it was.

C He is trying to bring his work up to date.

D He is not sleepy yet.

25. Noah: It's your turn to call out the names on the list if you'd like.

Mia: I think I'll pass this time.

What is Mia going to do?

A Make Noah call the names on the list.

B Create a list of names in the class.

C Pass out the names.

D Let someone else call the names.

26. Joe: I have never needed a tutor before, this is the first time.

Jessica: What's the issue?

Joe: Well, I understand the lectures but I get mixed up when I try to read the textbook.

What does Joe mean?

A The textbook is confusing.

B He is performing well in the class.

C The lecturer isn't very clear.

D The lectures are based on the textbook.

27. Harry: I need an advisor's signature on my course request form. Can I make an appointment, please?

Elizabeth: Oh, you don't need to make an appointment. Just wait here. I'll get a pen.

What is Elizabeth going to do?

A Schedule an appointment.

B Provide Harry with a pen.

C Sign the form for Harry.

D Wait for Harry.

28. Jacob: Is this the bus to the national stadium?

Tracy: No, this bus goes north to Bank Street. You want a bus that goes the opposite way.

What can be inferred from this conversation?

A Jacob needs to catch a southbound bus.

B There is no bus to the stadium.

C Traveling to the stadium by bus takes a long time.

D The national stadium is located on Bank Street.

29. George: Do you mind if I turn off the TV?

Isabella: Well, I'm currently watching a program. What does Isabella imply?

A George should also watch the program with her.

B George should leave the television on.

C The program will end soon.

D She will watch television later.

3. Hoàn thành đoạn hội thoại (Dialogue Completion)

1. Tom: I'm looking for good resources for my French research paper on French authors.

Jane: _____

Tom: Do you think I'll find what I need there?

Jane: Of course. I always use it for my French homework.

A No worries; my sister is studying French, too.

B You can't find them in the public library.

C I've told you that you ought to do your homework correctly

D Why don't you search for it on the net?

2. Mike: Do you think Mr. Smith is going to resign?

Julia: _____

Mike: Why do you think so?

Julia: He thinks it's time someone taught the manager a lesson by giving up the job.

A I'm not certain, but I think he is.

B He may because he's getting older.

C Yes, because he hasn't been doing well.

D No, he's actually quite good at his job.

3. Tim: Besides the news and sports programs, what else do you watch on television?

Walcott: _____

Tim: I agree, but sometimes there are some interesting discussions and plays.

Walcott: Maybe, but most of the ones I've seen have been quite dull.

A I didn't realize you spent so much time watching television.

B Only the plays are worth watching, right?

C Honestly, very little. There's so much rubbish on at present.

D I would give away the TV if it weren't for my father.

4. Lydia: Where's your computer? You do have one, don't you?

Joe: _____

Lydia: Will that take long?

Joe: I don't think so; they'll call me when it's ready.

A Yes, it's over there. We should move it out of the sun.

B Yeah, but right now it's getting fixed.

C No, I gave it to my sister.

D Well, I didn't like it at all and threw it away.

5. Tracy: I received my exam results today.

Damian: I'm sure they were good.

Tracy: _____

Damian: You don't need to say anything; I can tell by your expression!

A Of course they were. I'll also finish my thesis in a month.

B Why do you care about my exam results?

C They were about what I expected. I couldn't pass all of them.

D Yes, they were. I can't express how happy I am right now.

6. Julia: Why are you late?

Michael: _____

Julia: Why not? Was she at work?

Michael: Yes and she couldn't change her shift.

A I couldn't get my wife to take the kids to school.

B There was heavy traffic, and I was stuck in it.

C Well, you know my car. It broke down again.

D Why do you want to know? It's none of your business.

7. Linda: I'm shocked Julia was accepted into such a prestigious college.

Mie: _____

Linda: What makes you think that? I've seen her scholarship documents myself.

Mie: Everyone makes mistakes!

A She did really well in high school. Her marks were quite high.

B Why do you care so much about Julia's education?

C That college isn't all that exclusive. There are better ones in the U.S.

D I still find it hard to believe. Her rich father must have made a large donation to the school.

8. Mrs Susan: Well, can I make an appointment with Doctor Thomas, please?

Assistant: _____

Mrs Susan: No, I'm afraid I can't. What about the evening?

Assistant: Doctor Thomas isn't here in the evening. I'm sorry.

A Yes, would you like to be at nine to three on Tuesday?

B You can't; he's abroad this week.

C I can schedule you at 9:30 for the evening session.

D Will you really come? Doctor Thomas is quite busy nowadays.

9. Sophie: When should we inform her?

Jessica: _____

Sophie: I agree. Let's talk to her this afternoon.

Jessica: Great idea!

A How about waiting until next week?

B I think we shouldn't rush it.

C The sooner the better I think.

D I believe she's already aware of it.

10. Luke: Is Wilson coming to the party with us tomorrow?

Chandra: _____

Luke: Don't bother. On my way home, I can pay a visit.

Chandra: That's great.

A I don't care. Even if he doesn't come, I'll go.

B We should add some extra things in case he comes.

C He has to come because his girlfriend will be there

D I don't think so, but let's phone him to be sure.

11. Traffic Officer: Could I see your driver's license, please?

Driver: Why? I didn't do anything wrong.

Traffic Officer: _____

Driver: I'm afraid I don't. I was in a hurry.

A Why did you cross the street while ignoring the red light?

B You didn't forget to pick up your daughter from college, did you?

C Are you aware of the new traffic regulations?

D Do you realize how fast you were driving?

12. Mia: Did you call Ted?

Sam: Yes. I think something must be wrong because Ted wasn't home when I called.

Mia: _____

Sam: Why do you say that? You know Ted has been receiving alcohol therapy for a while and he is psychologically ill.

A Oh, you're always jumping to conclusions.

B That's true. I think we should call the police.

C I just called. He was at home having a bath.

D Oh, yes. He went to a party with his family.

13. Linda: It's raining outside!

Wilson: _____

Linda: But when it eases up, I'd like to go out.

Wilson: Linda, as I mentioned, I think we should wait until it stops.

A No matter how heavy the rain is, we need to catch the bus!

B Then why don't we stay inside for now?

C I have no intention to go outside at all.

D I don't care. What do you think about going for a walk?

14. Elizabeth: Did you attend the grand opening of the new mall on the corner?

Harry: _____

Elizabeth: Oh really! Why didn't you?

Harry: Grand openings tend to be very crowded. I like to explore during my free time instead.

A No, I never go to grand openings.

B No. We're planning to go at the weekend.

C Actually, I'm not really into shopping at all.

D Yes, I went, but I wasn't very impressed by anything.

15. Noah: Jacob, you seem anxious.

Jacob: _____

Noah: What's the matter? Is he not responding to your treatment?

Jacob: No, he isn't, and there doesn't seem to be any clear reason for it.

A I just left the operating room.

B No, actually, I've never been as happy as I am today in my life.

C I am. It's that patient again - the one I mentioned to you.

D Am I? Oh, it's nothing important.

16. Flora: Have you had a chance to read the accountant's report yet?

Maxwell: No, I didn't even know it was ready.

Flora: _____

Maxwell: Does that mean good news or bad news?

A Well, it is, but it's not well prepared.

B True. No one expected it this week.

C You will have a real surprise.

D Yes, I managed to read it yesterday.

17. Sarah: I see they are continuing to look into the cause of the fire at the restaurant.

George: _____

Sarah: Do you agree?

George: Yes, I do. However, it will be challenging to determine who is responsible.

A Some people believe it was intentionally set.

B There isn't actually a fire; it's just a rumor.

C The insurance companies involved are asking for a court investigation.

D From my perspective, the police aren't putting in enough effort.

18. Jasmine: I don't believe Andrew would bring a checkbook with him on vacation.

Ryan: _____

Jasmine: But he could bring traveler's cheques. They're a very safe option for carrying money overseas.

Ryan: Yes, and he could also take his credit card since he can use it to book hotel rooms and tickets.

A I think he should take some traveler's cheques with him.

B Personally, I prefer to bring my credit cards when I travel.

C No, it would be useless as he can only use it in his home country, not abroad.

D I agree with that. There's no reason for him to carry cash.

19. James: Has Tom shown up yet?

Richard: No. I think something might have happened.

James: _____

Richard: I don't know. I hope it's nothing serious.

A He must have been shocked after receiving a promotion.

B His sister was hospitalized last week.

C His sister was in a car accident last week.

D Oh? Do you think he actually won the lottery?

20. Richard: _____

Selina: Well, it's just that she wears a lot of makeup. In reality, true beauty comes from within.

Richard: Ah, I smell some jealousy here.

Selina: She has nothing that deserves my jealousy. I don't need to wear makeup to look good. Don't you agree?

A She's really beautiful, isn't she? Her skin looks so smooth!

B She was one of the most attractive business women I've ever seen. Don't you think so?

C Do you think cucumbers helped her look better after such a long day?

D After giving birth, her skin became clearer than ever.

21. Charlie: I have a job offer in the northern part of London.

Samantha: Oh, that's fantastic! But I'm going to miss you so much.

Charlie: Same here. Let's stay in contact.

Samantha: _____

A You can count on me. I won't forget. I'll keep you updated.

B Sounds good! I can't wait to hear from you soon.

C Sure. Remember to drop me a line when you settle down.

D Well, I do have your email.

22. Layla: Sorry, I overslept. My alarm didn't go off this morning.

Brian: _____

Layla: That's right, even though I did set it last night.

Brian: Your alarm clock never functions properly. Maybe you should consider getting a new one.

A Haven't you bought that recently?

B Again?

C Well, if it doesn't work again tomorrow, I'll definitely get a new one.

D You're never on time for morning meetings.

23. Daniel: _____

Oscar: Well, yes, but writing correctly in any foreign language is challenging, isn't it?

Daniel: I don't agree. I find it easy to write in Spanish. It's simple to read and write.

Oscar: Remember that you faced significant challenges when learning Spanish.

A It was quite disappointing to see you make a lot of mistakes while writing in English.

B For most students, reading books and writing essays in a foreign language is enjoyable.

C It's very hard to write flawlessly in English, isn't it?

D It's a tough but engaging topic to write about, isn't it?

24. Andrew: _____

Richard: I tried to contact you, but I couldn't get through.

Andrew: What time did you call?

Richard: I tried all morning.

A Why didn't you call me yesterday?

B As in the briefing, the industry you work in would be a profitable one to be engaged in.

C I can't understand why you couldn't reach me.

D You called me quite late yesterday, didn't you?

25. Mason: What are we going to have for lunch?

Susan: I'm going to prepare some lamb chops.

Mason: _____

Susan: That's odd! I just bought it a few days ago.

A Wow! You're very strong-willed.

B Really? Didn't you make a similar meal two days ago?

C I'm worried that the meat has already gone bad.

D I love all dishes made with lamb.

26. Jonathan: Kieran, can I have a word with you?

Kieran: Sure. What's on your mind?

Jonathan: _____

Kieran: Come on. Don't beat around the bush. Just tell me what you're thinking.

A Well, there's something that's been on my mind for a long time.

B Why don't we schedule a meeting to discuss the recent issues in the company?

C Let's forget about the birthday party we were invited to, OK?

D I'm not sure how to begin, but your attitude toward the employees really annoys me.

27. Liam: Hardly had you left the office when you received a phone call, but he didn't leave any message.

Jasmine: _____

Liam: Well, it may have been Mr. Ethan, but I'm not certain. Now I blame myself for not having asked his name.

Jasmine: No need to apologize! That's okay.

A You are constantly doing that. Why don't you ask for names?

B Didn't he leave any message for me?

C Oh, that's great; I had been expecting a call from him.

D It was an important call for me. Who did he sound like?

28. Tom: I don't want to choose from all these ridiculous options.

Liam: _____

Tom: Then, why don't we create a new one?

Liam: That sounds great! Let's do it!

A I have no issues with any of them.

B You're the only one who thinks that way. It's your decision to make.

C I don't like any of them either.

D I'm not sure if they're actually that bad.

29. Alan: We're looking for someone to go fishing with us on Sunday.

Jane: Well, you can count me out.

Alan: _____

Jane: My grandparents are coming for the whole weekend.

A I have other plans as well.

B Wow? Do you know how to count?

C How nice! Then I'm preparing the equipment.

D Come on, Jane! It will be fun!

30. Justin: How did you do on your geography test yesterday?

Daisy: Don't ask! I took third place from the last.

Justin: _____

Daisy: No kidding!

A I thought you did well on it.

B You don't deserve such low marks.

C Oh, it could have been worse.

D Everyone says the questions were really tough.

PHẦN 2 - DẠNG 2: KIẾN THỨC CHUNG - GENERAL KNOWLEDGE

1. Câu hỏi về kiến thức chung (General Knowledge)

1. When we exercise, we often sweat. So what is the primary benefit of sweating when you work out?

A Releasing excess water from the body.

B Lowering the internal temperature of the body.

C Repels harmful insects through the bad odor of the sweat.

D Releasing excess salt from the body.

2. You often connect many electrical appliances to the same power socket for convenience. However, your mother advises against doing so because:

A this can damage the devices due to overloading

B this can damage the domestic wiring due to overloading

C this can damage the electrical meter

D the appliance will not receive sufficient voltage

3. You've noticed that while laying a railway line, a small gap is left between the two rails at the joints. So gaps are left between railway tracks because:

A steel can be saved.

B accidents caused by contraction in winter can be avoided.

C air-gaps are necessary for bearing the weight of running train

D accidents caused by expansion in summer can be avoided.

4. When it is cold, the whole pond freezes and you can walk on it. However, fish and other aquatic organisms can survive in a deep frozen pond because:

A Fish are cold-blooded animals.

B The ice allows very little heat to escape.

C There will always be water just beneath the ice level.

D They are capable of adapting to living in ice.

5. You've noticed that water pipes in mountainous regions frequently burst on cold, frosty nights. This is because:

A The materials of the pipes shrink in low temperatures, leading to breaks.

B Water inside the pipes freezes, and when it freezes, it expands, causing the pipes to crack.

C Frost makes the pipes rusty, so they break.

D Rocks on the mountain rubbed against the pipe causing it to break.

6. When you step on a stone floor with bare feet, it feels cold, but walking on a carpet on the same floor feels warm. This is because:

A The floor and the carpet have different temperatures although they are in the same room

B The stone conveys the heat away from the feet more quickly than the carpet.

C The carpet conducts heat better than the stone.

D The human body maintains a stable temperature in both types of floors.

7. On cold winter days, you find that wearing two thin sweaters keeps us warmer than wearing just one thick sweater. Why is that?

A Two thin sweaters create extra thickness, which helps to reduce heat loss.

B The layer of air trapped between the two shirts acts as a good conductor.

C The air layer between the shirts serves as an effective insulator.

D There is no heat radiation occurring.

8. You stand on top of a building and drop two stones of different masses at the same time. What happens:

A The smaller stone hits the ground first.

B The larger stone hits the ground first.

C Both stones land at the same time.

D It depends on the composition of the stones.

9. A parachute and a stone are dropped from the same height. You see that while the parachute descends slowly, the dropped stone falls quickly. This is because:

A The stone is heavier than the parachute.

B The parachute has special mechanisms that allow it to fall slowly.

C The parachute has a larger surface area, resulting in greater air resistance.

D None of the above.

10. Air moves from areas where the air:

A has high humidity to areas with low humidity.

B has low pressure to areas with high pressure.

C has high pressure to areas with low pressure.

D has low humidity to areas with high humidity.

11. You've noticed that high rise buildings and even low height houses have lightning rods placed on their roofs. So why is lightning rod placed on top of buildings?

A So that it collects the electric power present in the lightning

B So that it repels the lightning that falls on the building

C So that it forces the lightning to fall in an area where there are no buildings

D So that it conducts electric charge to the ground when lightning strikes the building

12. Why do we commonly use a fuse in the main electrical supply for safety?

A Because it has a low resistance and a high melting point.

B Because it has a low resistance and a low melting point.

C Because it has a high resistance and a low melting point.

D Because it has a high resistance and a high melting point.

13. The packaging of snack bags or pre-packaged bread often appears much larger than the actual contents due to extra gas inside. What is the primary purpose of this extra gas?

A To preserve freshness by preventing oxidation and to protect the product from damage during transport by filling it with inert gases like nitrogen.

B To reduce the amount of product per package, allowing companies to save on costs by filling the bag mostly with air instead of contents.

C To create a misleading impression of quantity, as the puffed-up packaging gives a sense of fullness and larger size.

D To make the product appear larger, increasing its shelf space in stores and catching customers' attention..

14. Why are houses with thatched roofs cooler in summer and warmer in winter than houses with concrete roofs?

A Because thatched roofs allow better ventilation.

B Because thatched roofs reflect more sunlight than concrete roofs.

C Because the thatched roof contains a large amount of trapped air.

D Because thatched roofs are thicker than concrete roofs.

15. Why do dogs stretch out their tongues in summer?

A To regulate their body temperature and keep cool.

B To signal their hunger and look for food.

C To communicate with other dogs in a playful manner.

D To show submission and calmness in social situations.

16. Why does a fish underwater appear to be closer to the surface than it actually is?

A Because the fish is actually closer to the surface than we think.

B Because water increases the speed of light, which distorts the perception of distance.

C Because of the refraction of light as it passes through the water and air.

D Because fish are usually closer to the surface in shallow water, making them appear nearer to you.

17. Why do you need to stay hydrated while swimming?

A To prevent drowning.

B To keep your skin hydrated.

C To avoid feeling thirsty.

D To prevent dehydration and heat-related illnesses.

18. How do loud noises tend to damage hearing?

A Loud noises may create cracks in the ear drum.

B Loud noises may cause the eardrum to thin out.

C Loud noises may damage or break the tiny hair cells in your ears.

D Loud noises may cause the membrane covering the eardrum to wear out.

19. In the summer, it's very hot, and you have to sit by the fan to stay cool. However, when you go swimming, you find that the water in the open pond remains cool because:

A water evaporates continuously in hot weather.

B water loses heat more quickly than the surrounding air and reflects sunlight.

C water absorbs heat more slowly than the surrounding air.

D water takes in heat more quickly than the surrounding air.

20. Japan is called 'land of the rising sun' because:

A sun rises there as soon as it sets.

B Japan being the Easternmost country in the world, it has the earliest sunrise.

C sun always remains in the eastern part of the sky throughout the day in Japan.

D the rays of the sun get reflected from the waters of the sea and make the sunrise beautiful in Japan.

21. Which of the following actions should NOT be taken during an earthquake while you are inside a building?

A Rush to the door and enter an elevator

B Be mindful of the potential for exposed electrical wires.

C Find shelter in a doorway or take cover under a sturdy table or desk.

D Open the window and exit the building immediately if you smell gas.

22. If you find yourself caught in a rip current, you should:

A try to swim directly against the current to reach the shore as quickly as possible to save energy.

B stay calm and float to save your energy.

swim towards the shore to escape the rip current, then find the nearest path to swim back to the C shore.

D dive underwater to escape the current.

23. Why does it feel hotter on more humid days even though there is no difference in temperature?

A Because the water vapor in the air reflects sunlight back to the ground.

B Because humidity traps heat in the air and prevents it from escaping.

C Because high humidity increases the amount of sunlight absorbed by your body.

D Because high humidity prevents sweat from evaporating.

24. Which of the following is a common cause of home fires?

A The overuse of air fresheners in small spaces.

B Overloading electrical outlets with multiple devices.

C Leaving windows open while preparing meals.

D The storage of cleaning products in bathrooms.

25. What actions should you take if you detect the smell of gas in your home?

A Light a match to find the source of smell and avoid impact on power source

B Open windows to increase ventilation.

C Contact a professional to check for gas leaks.

D Ignore the smell because it will go away by itself.

26. What steps should you take if a small kitchen fire breaks out?

A Pour water on it to put out the flames.

B Cover it with a metal pot or lid.

C Ignore it and wait for it to extinguish itself.

D Fan the flames to help them diminish.

27. Which of the following statements does not represent a recommended safety precaution when using power tools?

A Keep your workspace clean and well-lit.

B Never yank the cord or the hose to detach it from the electrical outlet.

C Keep tools plugged in when not in use, before performing any maintenance, and when changing accessories such as blades, bits and cutters.

D Keep cords and hoses away from heat, oil, and sharp edges.

28. Noise pollution in the workplace is a problem that many people face today. The best way to prevent hearing loss at work is to:

A Keep track of your hearing loss over time with regular hearing tests.

B Always wear ear protection wherever you are.

C Monitor noise levels through engineering and administrative controls to minimize overexposure.

D Provide private rooms for all employees.

29. What should you do if you discover a leaking chemical container?

A Seal the container tightly

B Dispose of it in regular trash

C Report it to a supervisor

D Pour the contents down the drain

30. What is the proper method for lifting heavy objects?

A Bend your back when lifting.

B Use your leg muscles and maintain a straight back.

C Twist your body while lifting.

D Lift with only one hand to maintain body balance.

31. If you find yourself in a situation where you observe someone experiencing a seizure, it is important to respond appropriately to ensure their safety and well-being. What should you do in that situation?

A Restrain the person to prevent injury.

B Put any objects, such as a spoon, in their mouth to prevent biting their tongue

C Keep track of how long the seizure lasts.

D Clear the area around the person to prevent injury

32. What is the correct method for thawing frozen meat?

A Leave it out on the kitchen counter overnight.

B Put it in hot water.

C Thaw it in the refrigerator.

D Cook it straight from the frozen state.

33. We often feel uncomfortable being in a closed room with many people because:

A Oxygen levels decrease while carbon dioxide levels increase.

B Oxygen levels increase while carbon dioxide levels decrease.

C Both oxygen and carbon dioxide levels decrease.

D Both oxygen and carbon dioxide levels increase.

34. We often see electrical safety signs or labels on electrical equipment or power supply. What is the purpose of these safety signs or labels?

A To indicate the voltage level of an electrical system

B To provide instructions for using electrical equipment

C To warn of potential electrical risks

D To indicate the energy efficiency of electrical devices

35. Bats are animals that sleep during the day and become active at night. Bats are able to fly in the dark because:

A They are capable of seeing objects even in very low light conditions

B Their legs are not strong, making them vulnerable to predators

C They generate flashes of light

D They generate ultrasonic sound waves

36. On cloudy nights you usually feel warmer than on clear cloudless nights because clouds primarily:

A reflect the sun's rays back to Earth, increasing heat.

B block cold air from moving down from the sky to the Earth.

C trap heat by acting like a blanket, preventing heat from escaping.

D absorb heat during the day and release it at night.

37. A man finds it easier to swim in sea water, than in river water because:

A The density of sea water is lesser than the density of river water

B The density of sea water is more than the density of river water

C The sea is deeper compared to the river

D The sea is broader than the river

38. Why do you feel chill after having a dip in sea water

A The temperature difference between the sea water and the air.

B The evaporation of water from your body.

C The accumulation of salt on your skin.

D You have lost a lot of energy swimming.

39. Should cars have bumpers that collapse under impact?

A Yes, since the offending car should get damaged and pay for the mistake

B No, since it would be very expensive to get the car repaired

C No, since the colliding car would then ram into the occupants and kill them

D Yes, since they help to absorb the impact of a collision and keep the occupants safe

40. Why does an iron needle float on the surface of water when placed gently?

A It will remain under the water, when it will displace more water than its weight

B The density of needle is less than that of water

C This is caused by surface tension.

D Its shape allows it to float.

41. You have noticed that when people heat frozen food in a sealed pouch in the microwave, they always poke holes in the pouch first. Why do they do this?

A To prevent steam pressure from causing the pouch to burst.

B To enable heat to penetrate the food through the hole.

C To let microwaves reach the food through the holes.

D To allow the food's aroma to escape through the holes.

42. You've noticed that when a car is parked in the sun with its windows shut, it becomes extremely hot inside. This happens because of

A the heat produced by the engine

B the greenhouse effect

C the good conductivity of the metal body

D the double-layered windshield

43. What's the reason behind the blue color of the sky?

A The water vapor is present

B The sunlight gets scattered due to the air molecules

C The blue light gets absorbed by the air

D The blue light is emitted through the atmosphere

44. When an egg is dropped in freshwater, it sinks. However, when dropped in a concentrated salt solution, the egg floats. What is the likely cause?

A the egg absorbs salt from the solution and expands

B the albumin dissolves in the salt solution, making the egg lighter.

C the density of the salt solution is greater than the density of the egg.

D water has a high surface tension.

45. What is the reason for the extreme difference in temperatures at day and night in deserts?

A Low concentrations of carbon dioxide in deserts allow heat to escape more easily.

B Sand has high heat conduction properties.

C Lack of moisture results in rapid heat loss.

D All of the mentioned

46. What are 'keystone' species in an ecosystem?

A The species whose elimination can seriously affect the ecosystem.

B The species whose elimination can benefit the ecosystem.

C The species whose elimination would not affect the ecosystem.

D The species whose elimination can partly affect the ecosystem.

47. The water content in the atmosphere:

A Is not affected by temperature.

B Increases as temperature rises.

C Decreases as temperature rises.

D Can either increase or decrease with a rise in temperature.

48. What is the primary function of a greenhouse gas that contributes to the rise in the Earth's surface temperature?

A It is transparent to both incoming sunlight and outgoing infrared radiation.

B It blocks both incoming sunlight and outgoing infrared radiation.

C It allows outgoing infrared radiation to pass through while blocking incoming sunlight.

D It permits incoming sunlight to pass through but prevents outgoing infrared radiation.

49. The distribution of temperature on the earth is as follows: temperatures are greatest near the equator and decrease toward the poles. This distribution of temperature exists because:

A Air movement is generally towards the.equator

B Cold polar air masses prevent surface heating of the land

C Cold surfaces do not absorb solar energy as readily as warm surfaces

D Progressively lesser solar energy per unit area falls on the earth's surface as we move to polar regions

50. We are always looking for ways to reduce carbon dioxide emissions because an increase in carbon dioxide in the atmosphere leads to:

A A rise in Earth's temperature.

B A decrease in Earth's temperature.

C A stable Earth's temperature, with no seasonal fluctuations.

D An increase in ultraviolet rays.

51. When we hold a spiral conch shell close to our ear, we hear a whooshing sound. What is the most probable explanation for this?

A The sound is caused by the echo of blood flowing through the blood vessels in our ear.

B The sound is produced by air moving in and out of the shell.

C The surrounding ambient noise resonates inside the shell.

D None of the explanations provided in options A, B, or C are correct.

52. Winds and air currents differ in the aspect that

A Air currents blow much faster than winds

B Air currents are always moisture laden while the winds are usually dry

C The winds blow on lands while air currents blow over seas and oceans

D Winds are horizontal movements of air while air currents are the vertical movements of air

53. If you encounter a grizzly bear and don't have bear spray, what should you do?

A Run away as fast as possible.

B Slowly back away, and make yourself look as large as possible.

C Make any loud noises or screams to scare it off.

D Throw rocks at it to make it leave.

54. Which of the following is least likely to be an effect of global warming?

A More frequent hurricanes

B Loss of fertile delta areas for agriculture

C Reduced rate of photosynthesis in plants

D Shrinking of polar ice regions

55. What is the advantage of rainwater storage?

A It helps replenish groundwater levels.

B It provides relief from flooding.

C It reduces water shortages.

D It offers protection against soil erosion.

56. Nights in the deserts are cooler than in the plains because:

A Sand releases heat more rapidly than the ground.

B The sky is mostly clear which allows heat to escape easily.

C Sand absorbs heat more quickly than the ground.

D There are fewer trees in the desert.

57. The Savanna biome is characterized by an extensive cover of grasses with scattered trees. Many Savanna regions are unable to support good crops because:

A They have large tall grasses which form a canopy over the good crops and do not allow them to grow.

B There are large number of animals in this region, which eat up the crops

C The climate is too hot for the crops to grow

D They have poor soil which does not allow the crops to grow.

58. The role of spines in the desert plants is

A to help the tree to better resist winds.

B to limit the impact of light.

C to retain moisture and prevent evaporation.

D to attract insects for pollination.

59. The placement of a cement industry is mostly based on:

A Nearness to a port

B Where demand is high

C Where transportation facilities are available

D Availability of raw materials

60. Ice cubes are floating in a glass of water. What will occur to the water level when the ice cubes melt?

A It will increase.

B It will stay the same.

C It will first rise and then begin to fall.

D It will first decrease and then begin to increase.

61. In the northern polar region, there are six months of continuous daylight, while the southern polar region experiences six months of constant darkness due to:

A Earth is revolving around the sun

B Earth is inclined towards its orbital plane

C The rotation of the Earth

D The distance between the earth and the sun

62. Which of the following is not an effect caused by the Earth's rotation?

A It creates the cycle of day and night.

B All heavenly bodies, such as the sun, moon, and planets, seem to move from east to west.

C Winds change direction.

D The poles experience day and night lasting for six months.

63. Why do stars appear to move from the east to the west?

A Because the Earth rotates from west to east.

B Because the stars themselves are moving from the east to the west.

C Because the Earth's orbit around the Sun pulls the stars across the sky.

D Because the Earth's gravity pulls the stars from east to west as it rotates.

64. We always observe the same side of the Moon because:

A It does not rotate on its own axis.

B It rotates on its axis.

C The time it takes to rotate on its axis is the same as the time it takes to orbit the Earth.

D It moves at the same speed that the Earth orbits the Sun.

65. Which one of the following would have occurred if the earth had not been inclined on its own axis?

A All the seasons would have been of same duration

B The seasons would not have changed

C The summers would have lasted longer.

D The winters would have lasted longer.

66. Solar eclipse occurs when

A Earth comes between sun and moon

B Moon is at right angle to the earth

C Moon comes between sun and earth

D Sun comes between moon and earth

67. The world is divided into 24 time zones. Russia covers 11 of the world's 24 time zones. So why does Russia have many local time differences?

A Due to its extensive trade relations with various countries around the world.

B Because it experiences a wide range of climatic conditions

C Due to its long east-west stretches

D Because it is divided into a number of states on political grounds

68. Spring tide is a tide in which there is a very great rise and fall of the sea. Spring tides occur when

A The moon is nearest to the earth

B The moon is farthest from the earth

C The moon, the sun and the earth are at right angles with the earth at the apex

D The moon, the sun and the earth are in the same line

69. Health is not defined by which of the following?

A physical well being

B genetic disorders

C mental health

D social well being

70. Nutrients in food are often lost during processing. To retain nutrients in the food, before eating one should make sure to:

A wash fruits and vegetables after cutting them

B overcook the food

C wash rice and cereals in a lot of water

D cook the rice or cereals in the water in which they are soaked

71. What is the goal of performing a risk assessment in sanitation planning?

A To find opportunities for reducing costs.

B To assess the quality of cleaning products.

C To identify potential health and safety hazards

D To decide on employee scheduling.

72. Conservation of energy refers to the fact that:

A If you conserve energy you will not be as tired.

B Energy cannot be created or destroyed but can be converted from one form to another.

C No chemical reaction is 100 percent efficient.

D Energy remains constant over time.

73. Choose the appropriate reason for the following statement: Teenagers should probably shower more often than younger kids

A Teens have oilier skin

B Teens are more prone to getting dirty

C Teens have a heightened sense of smell

D Teens are more worried about their appearance

74. What is the reason for drying your hands after washing them?

A So that you don't drip water everywhere.

B Because germs and bacteria are more easily spread with wet hands.

C Your hands are slippery when wet, and you will not be able to hold kitchen utensils properly.

D Water makes your hands cold in the winter.

75. Which of the following statements about bacteria is true?

A Bacteria reproduce and grow more quickly in warm conditions.

B Bacteria require air to survive.

C Every type of bacteria can give people food poisoning.

D By freezing food you can kill bacteria.

76. The epicenter of an earthquake is:

A The point where the earthquake's intensity is highest

B The point where the earthquake begins

C The point on the Earth's surface that is directly above the earthquake's focus

D The point where the earthquake's intensity is lowest

77. A tsunami is a chain of fast moving waves in the ocean. Which of the following statements about tsunamis is INCORRECT?

A Tsunamis occur due to an underwater disturbance in the floor of the ocean.

B Tsunamis travel very short distances.

C Tsunamis happen only during severe weather.

D Tsunami means "harbor wave".

78. We often use water to put out some small fires. However, water is not effective for putting out a fire caused by petrol because:

A The flames are too hot for water to cool them down

B Water and petrol have a chemical reaction

C Water and petrol mix with each other and form a flammable substance

D Water, being heavy, slips below petrol which thus remains in contact with air and burns

79. Sea water is saltier than rain water because:

A Sea creatures produce salt

B The air above the sea contains a high salt content.

C Rivers wash away salts from earth and pour them into the sea

D Salt-producing mines are found on the seafloor

80. Color blindness is not life-threatening but makes work and daily life difficult. Based on your knowledge of this disorder, which of the following is not true about color blindness?

A Individuals with color blindness learn to depend on shapes, patterns, and the placement of signs and signals.

B The most prevalent form of color blindness is red-green color blindness.

C A color blind person cannot see any colors.

D Some people may find it challenging to distinguish the colors of traffic lights and signs.

81. When you're driving a forklift, it suddenly starts to tip over. What should you do:

A Jump out of the forklift immediately

B Remain in the vehicle with your seatbelt unbuckled

C Stay in the vehicle with your seatbelt buckled

D Stand up while holding the steering wheel tightly

82. Biodiversity loss has become one of the most urgent crises the world is facing today. The main reason for this is:

A there is nothing we can do about it

B we are not responsible for this loss

C we still do not know its entire extent

D it only impacts developing nations

83. We often wear sunscreen to prevent sunlight from reaching our skin. However, exposure to early sunlight is also beneficial for our health. Exposure to sunlight benefits a person's health because:

A It boosts immune strength

B Infrared light eliminates bacteria in the body

C Morning sunlight helps your body produce vitamin D

D It helps tan the skin to avoid skin problems

84. After replacing her old gas water heater with a new, gas water heater that is rated as highly efficient, Chandra's gas bill went up. Each of the following statements, if true, helps explain this increase EXCEPT:

A The new water heater consumes a smaller proportion of the gas used by Chandra's household compared to the old one.

B After having done his laundry at a laundromat, Chandra bought and started using a gas dryer B when she replaced her water heater.

C Chandra's utility company increased gas rates after the new water heater was installed.

D The unusually cold weather after the new water heater was installed led to higher gas D consumption.

PHẦN 2 - DẠNG 3: LÝ LUẬN LOGIC - LOGICAL REASONING

1. Sự thật và Quan điểm (Facts vs. Opinions)

1. Which of the following statements is an opinion?

A In the late 1800s, the United States acquired Alaska from Russia through a purchase.

B The document that granted independence to the United States from Britain is the Declaration of Independence.

C The Louisiana Purchase doubled the size of the United States in 1803.

D The acquisition of Alaska was the best decision made by the United States in the 19th century.

2. Which of the following statements is a fact?

A Nuclear power is the most effective method for the UK to generate electricity

B Only people from developing countries support renewable energy

C Biofuels are the most effective method for the UK to generate electricity

D Nuclear power plants utilize nuclear fission to produce energy

3. Which of the following statements is a fact?

A Heart disease is one of the leading causes of death in England.

B Burning the national flag should be illegal.

C It is significantly more challenging for a 17-year-old to raise a child compared to a 30-year-old.

D College graduates are more intelligent than those who drop out of high school.

4. Which of the following statements is an opinion:

A The quarterback scored four touchdowns in the game.

B The score was tied at the end of the final quarter.

C It's a fact that soccer and rugby are violent sports.

D Our team won the match by 7 points.

5. Which of the following statements is an opinion?

A The Nile is the longest river in Africa.

B The Caspian Sea is the largest lake in the world.

C In Judaism, Rosh Hashanah is the festival of the New Year.

D Female doctors are more caring than male doctors.

6. Which of the following statements is an opinion?

A London is the capital of England.

B C. S. Lewis authored 'The Lion, the Witch and the Wardrobe.'

C There was a terrible flu outbreak last year.

D Columbus discovered America in 1492.

7. Which of the following statements is a fact?

A Silver jewelry is more appealing than gold jewelry.

B Less money should be spent on space exploration and more money should be spent on supporting people in need.

C New York is the most thrilling city in the world.

D Copernicus was a 16th century Polish scholar who argued that the Earth moves around the sun.

8. Which one of the following statements is an opinion?

A The primary language spoken in the Philippines is known as Tagalog.

B The Titanic tragically sank in April 1912, resulting in the loss of 1,503 lives.

C The tallest building in the world is the Burj Khalifa in Dubai, standing at an impressive 830 meters.

D Prisoners should lose the right to vote

9. Which of the following statements is a fact?

A Butterflies are more beautiful than birds.

B Caravaggio was the greatest artist of the sixteenth century.

C At least half of all car accidents involve alcohol.

D Liverpool is the most fascinating city in England.

10. Which one of the following statements is an opinion?

A English belongs to the West Germanic branch of the Indo-European language family.

B The death penalty should be brought back for the crime of murder

C 100 degrees Celsius is equal to 212 degrees Fahrenheit.

D Diamond, graphite and amorphous carbon are all forms of carbon

11. Which one of the following statements is a fact?

A My brother is three years older than me.

B People ought to adopt stray dogs.

C Safe drugs should be made legal.

D The police's 'stop and search' authority should be restricted.

12. Which one of these statements is an opinion?

A The NBA season consists of 82 regular-season games.

B In 2015, the typical salary for an NHL player was around 2.9 million dollars.

C Wayne Gretzky is the all-time leader in points scored in the NHL.

D Tom Brady is the best quarterback to ever play in the NFL.

13. Choose the sentence that is a fact.

A Milan, Italy is the most fascinating city on earth!

B New York City is made up of five boroughs.

C If you can succeed in Washington, you can succeed anywhere.

D Milan is much too crowded and noisy

14. Which statement represents a judgment instead of a fact?

A My invention was great. I am certain my boss will promote me now.

B My invention was great. The clients all told me they liked it.

C My invention was great. It won an award from management.

D My invention was great. It was cited as such on my peer evaluation.

15. Which is a judgment, not a fact?

A That production of Harry Potter was of the highest quality; you'll never see it done better.

B That production of Harry Potter was of the highest quality; it was cited as such in the Times.

C That production of Harry Potter was of the highest quality; it won an award this year.

D That production of Harry Potter was of the highest quality; 96% of audience members interviewed after the show agreed

16. Read the statements and identify the opinion.

A Dolphins use a blowhole on top of their heads to breathe.

B Hot chocolate is tastier than French Vanilla.

C Dolphins are highly intelligent compared to other animals.

D My parents like classical music more than pop music.

17. Which of the following claims is not falsifiable?

A Mark's power of healing only works on people who are true believers in his power.

B Joana is the oldest living person on the planet.

C Tom can swallow swords without damaging his esophagus.

D Maya has the ability to foresee specific future events.

18. Which of the following claims is not verifiable?

A Astrological signs accurately predict personality traits.

B Science is the only trustworthy source of knowledge.

C Cigarettes cause lung cancer.

D Mars has three moons orbiting it.

19. Which of the following statements is a fact?

A Teachers ought to be permitted to hit children if they misbehave.

B Royal weddings always attract a lot of interest.

C The survey is a waste of time and resources.

D War is always wrong.

20. Which of the following claims would NOT be falsifiable?

A "Young adults experience anxiety more frequently than older individuals."

B "Pregnant mothers who take folic acid usually have healthier children."

C "Dreams are frequently disguised to conceal their real significance."

D "Early music training enhances language development in children."

21. If an argument leaves out some of the facts to make it sound more convincing:

A It will be biased

B It will be shorter

C It will be fairer

D It will have more opinions

22. Which of these is NOT an opinion?

A She said that her favorite color is red.

B Purple is a much nicer color than red.

C Purple flowers look the most delicate in the garden.

D Baseball is much more interesting than football.

23. Which one is only a claim, with no reasons given to back it up.

A What channel is your favorite movie on?

B This card can save you a lot of money.

C Vote Republican in the upcoming election, as it will address nearly all of the world's issues.

D George Washington was the first president of the United States. My history teacher said so, and I looked it up on Wikipedia with my computer.

24. Which one of the following statements is an opinion?

A According to the latest survey, families are purchasing more household items on credit.

B English professional football puts too much emphasis on money.

C The latest poll shows a marked increase in employee dissatisfaction.

D The use of computers at the college has increased and the stationery budget has doubled in the last few years.

25. Which of the following statements is an opinion?

A Local councilors are elected for a term of four years.

B The science team has discovered a new method for performing this experiment.

C You can hear all the news you need to know from the VOA Channel 4 news team.

D Seven out of ten who took the quiz answered the questions correctly.

26. Which scenario best represents a situation that has been decided by emotion alone?

A Mia dislikes winter so much that she goes on a vacation to the Bahamas, even though it's beyond her budget.

B The school closes in response to a bomb threat.

C John's company reported third-quarter earnings that exceeded expectations.

D Mark is in need of a new mixer, so he checks the newspaper ads and purchases one when it's on sale.

27. Choose the sentence that is a fact.

A English is an easier language to learn than Chinese.

B Mobile phones should be banned in all public school classrooms.

C Bicycling is a truly enjoyable form of exercise.

D More people stopped smoking last year than three years ago.

28. Which one of the following statements is an opinion?

A The Ministry of Health recommends that adults drink 6 to 8 glasses of water daily for proper hydration.

B The number of people who have high credit card debt is astonishing.

C "Spam" is the email equivalent of junk mail.

D Each year, thousands of people die due to interactions between their prescription medications.

29. Which of the following is a fact?

A There is more water than land in the world.

B England is the ideal location for raising a family.

C Oceans ought to be named after various animal species.

D The greatest adventure would involve sailing around the entire globe.

30. Which of the following is a fact?

A The quality of life has decreased in the last ten years.

B The written part of the driving test must be completed before the practical driving part.

C If you live in London, you have to be able to use the underground.

D Local councilors should spend more time listening to residents and less time listening to each other.

2. Khẳng định và Kết luận (Statements vs. Conclusions)

1. Statement: Elections follow a set of established rules and regulations to guarantee fairness and freedom, while also ensuring a consistent process for determining the winner

Conclusion: _____

A Elections are crucial in the process of forming the Government.

B The organization and management of electoral processes are quite clear and simple.

C In organized procedure, voter records are usually kept and may be publicly announced or reported in the media.

D A person who is physically and mentally fit is not required to take part in elections.

2. Statement: The government will soon introduce a bill that would allow the establishment of private universities under strict regulations.

Conclusion: _____

A There are already some private universities operating in our country.

B There is an increasing demand for more universities.

C Such regulations can be issued without informing the Parliament.

D The government gives directions to establish anything in the private sector.

3. Statement: The family planning program in China has partly succeeded.

Conclusion: _____

A The population growth rate in China is still very high.

B There are no adequate healthcare arrangements in rural areas.

C Telecommunication media are not effectively conveying the messages.

D Criticism of limited family size is constrained by our religious beliefs.

4. Statement: If you're a badminton player, you don't have to go to a gym or use fitness equipment for a workout. All you need is a shuttlecock and a racquet.

Conclusion: _____

A Badminton player is better than a gymnast.

B Playing outdoors has more health benefits than playing indoors.

C Playing badminton is an effective and convenient form of exercise.

D Poor quality badminton rackets can cause badminton players to have sore hands.

5. Statement: In response to the floods in the city, the government decided to redouble its efforts to eliminate the underlying causes and assured all help to the city's residents in this regard.

Conclusion: _____

A The public believes that the government is failing to protect the city's residents from floods.

B

Following the devastating floods in the city last year, the government has taken various steps to control it.

C People should leave their homes during floods to stay safe.

D As more cities are submerged, people are discussing the steps taken by the government.

6. Statement: Television leads viewers to believe that the chances of becoming a victim of violent crime are very high, while also persuading viewers to passively accept whatever happens to them.

Conclusion: _____

A Watching TV encourages criminal activity.

B TV audiences are more susceptible to victimization than others.

C People ought to stop watching television.

D TV promotes a feeling of helpless vulnerability in viewers.

7. Statement: A forest contains an equal number of Prunus trees and Juglan trees. Three-fourths of the trees are mature, and half of the trees are in the flowering stage.

Conclusion: _____

A All Juglan trees are in the flowering stage.

B At least half of the Juglan trees are mature.

C Half of the Prunus trees are in the flowering stage.

D None of these.

8. Statement: Many business offices are located in buildings having two to eight floors. If a building has more than three floors, it has a lift.

Conclusion: _____

A All floors may be reached by lifts.

B Lifts are available only for floors above the third.

C Seventh floors have lifts.

D Second floors do not have lifts.

9. The information provided by the U.S. Department of Labor suggests that by the year 2000, there will be a shortage of 100,000 programmers. An industry representative stated, "We need to fully understand this situation; America needs Indian programmers. This is not only the question of investment but also of the talent with which the Indian programmers are equipped."

A Other industries will also face a shortage of talented labor by the year 2000.

B Indian programmers are the most talented in the world.

C Despite investing significantly in Software Training, the U.S. has been unable to fully satisfy its own demands.

D The Indian software market is well equipped to send programmes to other countries.

10. All the books written by Simon are textbooks, and some of these are published by Forest Publishing Company.

A Forest Publishing Company only publishes textbooks.

B Some textbooks written by Simon are published by companies other than Forest Publishing Company.

C Forest Publishing Company publishes some critical essays by Simon.

D All books published by Forest Publishing Company have been written by Simon.

11. All the students in Miss Jane's class are intelligent. Jack is not intelligent.

A Some students are not intelligent.

B Jack must work hard.

C Unintelligent people are not students.

D Jack is not a student of Miss Jane's class.

12. If it is true that 'Good governance implies law and order in society' then identify the statement which has to be accepted along with the given statement?

A An able government very effectively uses laws to promote peace.

B A healthy society is governed by a maximum number of laws.

C A powerful government relies on force to enforce laws.

D Law is indispensable for society.

13. All guilty politicians were arrested, and Liam and Kate were among those arrested.

A All politicians are guilty.

B All the arrested individuals are politicians.

C Liam and Kate were not politicians.

D Liam and Kate were guilty.

14. In the national examination, the majority of candidates use English as their medium of writing.

A Some candidates in this examination write in English.

B Most candidates with English medium appear in this examination.

C No candidates in this examination write in any language other than English.

D Every candidate participating in this examination writes their answers in English.

15. Statement: Most of the students usually fail to apply what they studied in their courses in school into practice because they studied the course just so they could pass the examination.

Conclusions:

I. Most of the students are just trying to pass the examination.

II. There is less emphasis on learning by teachers.

A Both conclusions I and II follow.

B Only conclusion II follows.

C Only conclusion I follows.

D Neither conclusion I nor II follows.

16. Statements: United Nation has adopted 21st June as world Yoga day. This has promoted India's glorious tradition all over the world.

Conclusions:

I. Yoga is practiced only on 21st June.

II. More people are coming to India now to practice Yoga.

A Neither conclusion I nor II follows.

B Only conclusion I follows.

C Only conclusion II follows.

D Both conclusions I and II follow.

17. I. The prices of wooden furniture available in the market have decreased.

II. The government has lowered the import duty on wooden furniture.

A l is the main cause and II is the main effect.

BI is an effect but II is not the main cause.

C II is the main cause and I is the main effect.

D II is an effect but I is not the main cause.

18. I. The inflation rate in India has decreased.

II. The Reserve Bank of India has raised interest rates.

A l is the main cause and II is the main effect.

BI is an effect but II is not the main cause.

C II is the main cause and I is the main effect.

D II is an effect but I is not the main cause.

19. I. Sea level is steadily rising.

II. Global Warming is a serious problem which the world is facing.

A I is the main cause and II is the main effect.

BI is an effect but II is not the main cause.

C II is an effect but I is not the main cause.

D II is the main cause and I is the main effect.

20. Statement: Unfortunately, because of the pandemic that interrupted Liverpool's title run, fans missed out on what would have been a memorable night at Anfield stadium.

Conclusions:

I. Because of the COVID-19 pandemic, fans were not allowed to enter the stadium.

II. Liverpool would have won the title earlier, but matches were postponed due to the COVID-19 pandemic.

A Only conclusion I follows

B Only conclusion II follows

C Both I and II follow

D Neither I nor II follows

21. Statement: Countries worldwide are enforcing lockdowns and new health checks at their borders to prevent a resurgence of the coronavirus before it escalates further.

Conclusions:

I. The coronavirus infection is likely to recur in areas believed to be free of the disease.

II. Many governments are taking a cautious approach to managing the pandemic.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

22. Statement: FAH was one of the worst-performing stocks on Thursday morning, dropping as much as 20% after the company announced that the release of its next-generation chips will be postponed indefinitely.

Conclusions:

I. FAH's commercial prospects are highly dependent on the launch of next-generation chips.

II. FAH's competitors have advanced significantly regarding next-generation chips.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

23. Statement: In Mongolia and throughout much of the Arctic, significant changes are occurring more quickly than scientists predicted just a few years ago.

Conclusions:

I. Global temperatures are increasing alarmingly.

II. The pace of climate change in the Arctic has accelerated in recent years.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

24. Statement: A former official who left the Trump administration last year stated that Trump frequently resisted advisers who recommended implementing stricter punitive actions against China, fearing it would destroy trade negotiations.

Conclusions:

1. President Trump refrained from imposing strict punitive measures on China due to concerns about negative effects on bilateral trade.

II. China has the advantage in trade negotiations with the US.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

25. Statement: During the pandemic, airlines are taking extreme measures to survive, with Asiana Airlines Inc. flying the world's largest commercial plane more than 20 times, going nowhere and carrying no passengers, just to maintain certification for trainee pilots.

Conclusions:

I. Aviation sector has been hit really hard due to the ongoing pandemic.

II. Asiana Airlines might face bankruptcy due to the pandemic's impact.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

26. Statement: Building dams has disrupted the natural flow of rivers and, in many instances, worsened flood conditions.

Conclusions:

1. Construction of dams has backfired leading to more flood occurrences in many cases.

II. Dams are the sole method for preventing river bank flooding.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

27. Statement: Container trains save time and trade costs apart from enhancing the safety and organization of trade.

Conclusions:

I. Despite their clear benefits, container trains are not utilized to their full potential.

II. Container trains offer significant advantages compared to most other methods of cargo transport.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

28. Statement: Although there is a complete ban on fires inside the Amazon rainforest, Greenpeace International's images show that illegal fires used to clear land for commercial activities has been ongoing without much hindrance in Brazil.

Conclusions:

I. Forest fires happen every year in the Amazon rainforest.

II. The Brazilian government's ban on illegal fires has not been effective in stopping these incidents.

A Neither I nor II follows

B Both I and II follow

C Only conclusion I follows

D Only conclusion II follows

29. Statement: Hurricane Winfra, currently the strongest storm in the world, is heading toward the Hawaiian Islands but is expected to weaken significantly before it arrives this weekend.

Conclusions:

I. The damage to Hawaii from Hurricane Winfra may not be as severe as initially anticipated.

II. Winfra is the strongest storm to affect Hawaii this year.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

30. Statement: Tea estates in the Moorland are experiencing extended power outages because of heavy rainfall and waterlogging, which is hindering tea production.

Conclusions:

I. The Dooars region is experiencing significant rainfall.

II. Continuous electricity is essential for the functioning of tea gardens.

A Only conclusion I follows

B Only conclusion II follows

C Neither I nor II follows

D Both I and II follow

3. Phân tích lập luận (Analysing arguments)

1. Hurricanes originate over the ocean and need to remain over water to maintain their strong winds. They typically form in tropical regions during late summer and early autumn when ocean temperatures are highest. Once they move onto land, they weaken and eventually dissipate. Based on this information, which of the following statements must also be true?

A A coastal city is more vulnerable to being struck by a hurricane than an inland city.

B Hurricanes cannot hit northern coastal areas of the United States because the waters are too cold.

C A hurricane would struggle to cause significant damage more than a few miles inland.

D Hurricanes that develop in early autumn are generally more powerful than those that form in late summer.

2. A home freezer temperature should be set at or below O°F to preserve the flavor of food for as long as possible. Even when stored at the proper temperature, frozen foods only remain safe for about 1 year. For every 5 degrees of temperature above zero, the life of food is cut in half. Most home freezers temperature is set about 10 degrees.

If these points are accurate, which of the following must also be true?

A Most home freezers can store food for no more than three months.

B Most homeowners do not know the temperature of their freezers.

C Frozen foods can still be safe to eat, even if their flavor has declined.

D Most foods in home freezers are stored past the point where the food's best flavor begins to decline.

3. Researchers in Russia have found that dogs can understand human language quite well, with their vocabulary comparable to that of other intelligent animals like chimpanzees, dolphins, and parrots. For instance, a golden retriever named Ryan can understand over 200 words and is able to learn additional words.

Based on this information, which of the following statements must also be true?

A Dogs can only learn words if their human trainers consistently use the same terms for the same objects.

B Some chimpanzees can understand more than 200 words.

C Dogs in Russia understand more human words than some other types of dogs.

D A vocabulary training method that works for chimpanzees would also work for dogs.

4. LASIK is a surgical procedure designed to correct vision issues like nearsightedness. In most cases, LASIK can correct a patient's vision to near 20/20, eliminating the need for glasses. However, patients should be aware that no doctor can guarantee results, and there are risks of side effects, including vision loss, severe dry eyes, glare or halos affecting night vision, and loss of depth perception.

Which of the following is most supported by this information?

A A prospective LASIK patient must find a surgeon who is experienced in using the LASIK machinery.

B Patients who need reading glasses before undergoing LASIK often still need them after the procedure.

C Even if a patient achieves 20/20 vision after LASIK, his eyesight can still change with age, resulting in imperfect vision once again.

D LASIK is usually successful at improving a patient's vision, but it does not always result in perfect uncorrected eyesight and can create new problems for the patient.

5. Americans blame the outsourcing of jobs to other countries for the high unemployment rate, arguing that companies are transferring jobs away from U.S. workers to places with lower labor costs. However, statistics from the U.S. Department of Labor revealed that only 8 percent of layoffs are linked to outsourcing, and of that 8 percent, nearly three-quarters of the jobs are relocated to different areas within the United States rather than to foreign countries.

If these statements are true, which of the following is most strongly supported?

A American workers should not be concerned about losing their jobs to outsourcing.

B Outsourcing to foreign countries is an inevitable result of globalization, leading to layoffs of American workers in jobs that can be done more cheaply elsewhere.

C Outsourcing to foreign countries is not nearly as important a cause of layoffs as many Americans mistakenly believe.

D Outsourcing of jobs to other areas within the U.S. does not harm the national economy but benefits one local economy at the expense of another.

6. Implementing dress codes in public schools has many benefits. It cuts down on disciplinary problems, reduces theft, and makes it difficult for wealthy students to mock poorer ones because of their clothes. While dress codes limit personal expression, they are not meant to encourage nonconformity in schools. A dress code is effective only if all students follow it.

Which of the following is most supported by this information?

A Public schools should be a place for individual expression.

B Enforcing conformity on public school students is justifiable.

C The only way to implement a dress code is to assign students an official uniform.

D Most parents of public school students prefer dress codes because it is easier and cheaper for their children to dress for school.

7. An art museum has acquired a bronze statue that it believes to be a sculpture of Athena by the renowned ancient Greek sculptor Phidias. Only a few sculptures known to be by Phidias exist today, and many pieces once attributed to him are actually Roman copies of his originals.

Accurately dating ancient sculptures poses challenges for scholars, but they have identified several characteristics of this statue that suggest it likely dates back to the time of Phidias, and it certainly matches the sculptor's style.

Which of the following is most strongly supported by this information?

A The art museum cannot be certain that this statue was created by Phidias.

B Some museums have acquired sculptures they believed were ancient works but later found out were produced by modern forgers.

C Scholars will be able to state conclusively whether this statue was made by Phidias after thorough research and investigation.

D Phidias's style is so distinctive that it is easily recognizable in his originals as opposed to copies.

8. In Michigan, most universities provide technology courses, and most of those that offer technology courses offer economics courses. However, any university that provides economics courses without technology courses does offer evening classes, and no privately-owned university in Michigan offers evening classes.

Given these statements, which of the following must be true?

A No privately-owned university in Michigan offers economics courses without technology courses.

B Any privately-owned university in Michigan that does not provide economics courses offers technology courses.

C Some universities in Michigan that offer evening classes also provide technology courses.

D No universities in Michigan that offer both technology and economics courses provide evening classes.

9. Movies with ongoing violence usually get an R rating. Kids under 17 can only see R-rated movies in theaters with a parent or an adult guardian. Mr. Thomas and Mr. Mark are two directors whose every movie has been given an R rating, while only some of Ms. Sophia's movies are R rated. Which one of the following logically follows from the statements above, if they are true?

A A child under 17 cannot see a Mr. Mark's movie alone in a theater.

B No Mr. Thomas's movie can be seen by a child or an under-17 in a theater.

C A child is more likely to see a Ms. Sophia's movie than a Mr. Mark's movie in a theater.

D Some of Ms. Sophia's movies do not contain ongoing violence.

10. One hundred students at Lincoln College were surveyed about their favorite movie genres:

romantic, drama, and tragedy. Each student chose one genre. More than half picked romantic, over a quarter chose drama, and at least one picked tragedy. When asked about the movie Titanic, more than three-quarters considered it a romantic film.

Based on this information, which of the following statements must also be true?

A Only students who preferred romantic and drama genres viewed Titanic as a romantic movie.

B At least one student from each genre viewed Titanic as a romantic movie.

C Some students who preferred romantic genres viewed Titanic as a romantic movie.

D Some students who preferred tragedy genres viewed Titanic as a romantic movie.

11. The sugar pine is an evergreen tree found in the Sierra Nevada region. The sugar pine produces edible, nutritious seeds. Recently, a compound found in the bark of the sugar pine was discovered to have potential as a new anticancer drug.

Which of the following is most strongly supported by this information?

A The compound is poisonous when consumed by healthy people.

B The compound has cured people from various diseases.

C People should not eat the seeds of the sugar pine.

D The sugar pine was regarded as unimportant until the compound was discovered.

12. Restoring medieval artwork often revives the original colors, creating a challenge for art historians. Modern interpretations of medieval art have relied on pre-restoration colors and now need to be reassessed.

Which of the following principles, if true, most supports this reasoning?

A Art interpretation must be conducted in the era when the artwork was created.

B Art historians are the best judges of an artwork's value.

C The colors in a piece of art play a crucial role in its interpretation.

D Art interpretation changes depending on the time period in which the interpretation is made.

13. The need of the hour is to distribute medicine and medical facilities globally to ensure that people in developing and underdeveloped countries receive proper health care. This paragraph supports which of the following statements;

A Majority of the people in the world do not want to go to a doctor

B Medicine production is slow in developing countries

C Medicine production should be increased in developing and undeveloped countries

D Most of the people in developing & underdeveloped countries are not getting enough medical care

14. The head teacher of a high school has been informed by parents about incidents of bullying occurring in the schoolyard during break time. To solve this issue quickly, the head teacher has asked recess aides to monitor the situation closely and conduct an investigation to stop this behavior.

Which situation below should the recess aides report to the head teacher?

A Two boys are playing a one-on-one game of basketball and are arguing over the last basket scored.

B A girl is sitting alone on a bench, reading a novel and not interacting with her friends.

C Four boys are gathered around a handheld video game that isn't allowed at school.

D Five boys are surrounding another boy and seem to take his backpack.

15. Individuals living in poverty often have limited money to spend on food, leading to malnutrition.

Ironically, these people also experience high rates of obesity.

Which of the following explanations best clarifies this apparent contradiction?

A Recent data indicates that processed and fast foods constitute nearly half the diet of many people in the United States.

B People in poverty may lack an understanding of basic nutrition principles.

C Many Americans have gotten out of the habit of cooking family meals, resulting in fewer people knowing how to prepare healthy foods like vegetables.

D The cheap foods that form the majority of poor people's diets are high in calories but devoid of essential nutrients.

16. Emily and Jake each drove from San Francisco to Oakland, leaving at the same time. Emily drove her car, while Jake used a small electric scooter that couldn't go faster than 25 kph. They followed the same route, which had a speed limit of 60 kph for cars. Yet, they both arrived at their destination at the same time.

Which of the following, if true, best explains why Emily and Jake arrived in Oakland at the same time?

A Jake never exceeded 25 kph, but he sometimes rode on the sidewalk to pas the stopped cars.

B Traffic between San Francisco and Oakland was so bad that Emily couldn't go faster than 25 kph.

C Emily and Jake used the same navigation apps.

D Emily had to stop at 74 red lights, while Jake only stopped at 68 red lights.

17. Even though global grain consumption has been greater than production for five consecutive years, a food supply crisis is unlikely in the near future. The shortfalls have mainly come from reduced grain output in China, which is shifting from a policy of central control over agricultural production to a market-driven one. As a result, if demand for grain continues to exceed supply,

China's grain production is expected to rise significantly.

Which principle best helps to justify this reasoning?

A Global markets respond more slowly than regional markets, so local rates of production usually change more rapidly than the global average.

B When agricultural production is centrally controlled, it is unable to respond to changing demand by adjusting rates of supply.

C When agricultural production is market-driven, it is likely to respond to rising demand by increasing production.

D Centrally controlled agriculture is generally less efficient than market-driven systems.

18. Geneticist: The likelihood of a woman having a child with Down syndrome significantly rises when she turns 35. By age 49, a woman has a one in four chance of conceiving a child with such abnormalities. However, most children with Down syndrome are born to mothers younger than 35.

Which of the following statements, if true, best explains the geneticist's two claims?

A The number of women having children in their forties has increased in the past decade.

B Many mothers choose to terminate pregnancies when prenatal tests reveal chromosomal abnormalities.

C New tests can now detect Down syndrome in fetuses during the first trimester.

D Most babies are born to mothers younger than 35.

19. I. Cars manufactured by German companies are generally more durable than those made by Italian companies.

II. On average, an Italian-made car lasts about four years longer than a German-made car.

Which of the following statements, if true, would help clarify the discrepancy mentioned above?

A Cars produced by German companies tend to have longer lifetimes than they do in Germany or in the northern parts of Italy.

B German cars are constructed with more durable components than Italian cars.

C People typically purchase cars from companies in their own country, and German people put more stress on their cars than Italians do.

D Certain individuals may attempt to manipulate data about average car lifespan to benefit national trade.

20. Most experts believe that strictly following hurricane preparedness protocols helps reduce deaths from hurricanes. However, in Queensland, a hurricane in 2009, when the state did not follow this protocol, resulted in only 25 deaths, while a 2018 hurricane, when the protocol was strictly followed, led to 53 deaths.

Which one of the following, if true, most helps to reconcile the experts' belief with the apparently contradictory evidence described above?

A The death toll from hurricanes is directly proportional to the intensity of the hurricanes and the 2018 hurricane was five times more intense than the one in 2009.

B Implementation of the hurricane preparedness protocol ensures the rapid evacuation of people from areas that are likely to be affected by the hurricane.

C Studies show that the adoption of the hurricane preparedness protocol can give residents a false sense of security, causing them to ignore individual safety measures.

D The population of the state of Queensland increased by 10 percent between the years 2009 and 2018.

21. Snakes are present on every continent except Antarctica, which is inhospitable to cold-blooded animals. Australia is home to many of the world's deadliest snakes, but New Zealand, located nearby, has no snakes at all. Scientists believe that snakes first appeared around 100 million years ago when the continents were connected, and as they drifted apart, snakes remained on the larger land masses. Therefore, snakes are not found in New Zealand because they cannot swim and thus could not reach the island.

Which of the following statements, if true, would most support this argument?

A Snakes are found on many other islands in the Pacific Ocean.

B Snakes are present in South America at latitudes further south than New Zealand.

C Sea snakes can swim and are found in the warmer oceans of the world.

D Snakes are also absent from other major islands, such as Hawaii, Ireland, and Greenland.

22. Grand Junction milkvetch, a rare plant found only in Colorado, reproduces when pollinators like flies or bees carry the pollen grain from the male part of one plant to the female part of another plant of the same species. To help maintain the population of this species, pesticides used to control grasshoppers should be banned in this area, as they also significantly kill the Bombylius flies, which are key pollinators for Grand Junction milkvetch.

Which one of the following, if true, most strengthens the argument?

A Grand Junction milkvetch is also pollinated, though to a lesser extent, by some local bees.

B Pesticides that target insects other than grasshoppers are even more harmful to Bombylius flies.

C Bombylius flies reproduce slowly and take many years to recover their populations after one spraying of a pesticide that controls grasshoppers.

D Other plant species in Colorado have decreased even more than Grand Junction milkvetch since the pesticide use began.

23. The state should continue to implement the death penalty as a punishment for the most serious criminals. It is the only way to give closure to the victims' families. Individuals who commit cold-blooded, premeditated murders are incurable. Anyone convicted by a jury of a truly horrific crime deserves the death penalty.

Which of the following statements, if true, most weakens this argument?

A urveys of the families of murder victims indicate that most surviving relatives strongly support the death penalty.

B Carrying out the death penalty on convicted criminals is significantly less expensive than keeping them in maximum-security prisons for life, with no possibility of release.

C Recent research has revealed that a substantial number of people sentenced to death are later found to be innocent.

D Many states that previously supported the death penalty are now moving away from it, resulting in a significant decline in the number of death penalties in recent years.

24. In 2003, luggage belonging to 2.2 million passengers was lost. Travelers should never check their bags when they fly on commercial airlines.

Which one of the following, if true, most weakens this argument?

A Airlines recommend packing a small carry-on with essential items like medicines, eyeglasses, toiletries, and a change of clothes.

B When luggage is lost, travelers sometimes have to urgently buy clothes for business meetings, leading to high costs.

C Buying new clothes to replace those that were packed in lost luggage is not always possible; for C example, passengers who arrive at their destination during a national holiday may have to wait days for shops to open.

D Despite the large number of lost bags, airlines only lose the bags of 4 out of every 1,000 passengers, so the odds of arriving without checked luggage are very low.

25. Requiring businesses to provide paid leave for family issues, such as paternity leave or caring for a sick child, is a bad idea. If companies allow this time off, the workers will take advantage of the privilege and minimize their time at work, which will harm productivity and morale. Which of the following statements, if true, most weakens this argument?

A Asian countries offer employees generous family leave and paid vacation, but their standard of living is slightly lower than that of Europe.

B Many male employees do not take paternity leave, even though it is allowed under federal law and supported by their employers, because they worry it will upset their colleagues and harm their promotion prospects, as it's often viewed as an unimportant reason.

C In some workplaces, losing even one employee during a busy season can be very damaging; allowing family leave can overwhelm those who remain.

D Allowing employees to take family leave decreases absenteeism, boosts morale, and enhances productivity, as employees tend to work much harder when they return.

26. Monica: We should get rid of mosquitoes because they harm humans by spreading serious diseases like malaria and dengue fever, and they provide no benefits. Ecologists have found that the loss of a single species usually doesn't harm the rest of the ecosystem, so eradicating mosquitoes wouldn't harm the environment.

Which one of the following, if true, most weakens Monica's argument?

A Restoring wetlands often leads to increased mosquito populations.

B Mosquitoes have historically helped control human and animal populations by spreading disease.

C Many animals eat mosquitoes and other flying insects.

D The only substances that could eliminate all mosquitoes would also kill many birds and beneficial insects.

27. A cosmetics company conducted a study on hair colors with 100 women, all of whom used the same hair dye. Half of them washed their hair with a special shampoo designed for color-treated hair, while the other half used regular shampoo. After two months, there was no difference in color fading between the two groups. Therefore, shampoo for color-treated hair is ineffective.

Which of the following statements, if true, most weakens this argument?

A Most shampoos contain similar basic ingredients, such as sodium lauryl sulfate or sodium laureth sulfate.

B Advances in hair color technology over the last ten years have enabled women to successfully color their hair at home.

C Both groups included an equal number of women in their 30s, 40s, and 50s, with similar natural hair colors.

D The women who used shampoo for color-treated hair had softer and shinier hair compared to those who used regular shampoo.

28. Aptitude tests have been used in German schools since the late 19th century to sort students into different tracks, some leading to the university, and some straight to technical jobs. The current German education system faces discipline issues and underperforming students, suggesting that aptitude tests are valueless for sorting students.

Which of the following statements weakens this argument EXCEPT:

A Discipline problems are most severe in technical schools with many immigrant students, who feel that society will not give them opportunities for self-improvement.

B Sorting students by ability helps tailor curricula to their needs, leading to better overall outcomes.

C Until the early 1990s, the German school system was one of the best in the world, with excellent test results and virtually no disciplinary problems.

D Students who graduate from German technical schools are usually prepared to perform highly skilled jobs that pay them well.

29. This year, New South Wales's wheat crop has been severely affected by a new type of strawworm that is resistant to all known pesticides. As a result, the state's wheat production has decreased by 43 percent this year. Since this strawworm reproduces quickly, it is expected to spread to all wheat-producing states in Australia by next year, leading to a predicted decline of at least 43 percent in national wheat production.

Which of the following statements, if true, most weakens this argument?

A The natural predators of this strawworm are unable to survive in New South Wales, but wheat farms in other states have large populations of these predators.

B Ninety-five percent of all wheat produced in Australia is of the upland variety, which is also the only type grown in New South Wales.

C Domestic wheat prices are unlikely to rise next year because Australia can meet its domestic wheat needs through imports.

D Agricultural scientists in Australia are actively working to develop a genetically modified wheat variety that can resist this strawworm.

30. Moral values enable individuals to improve their actions, intentions, motives, and relationships with others. They also serve as the foundation for all religious practices.

Which of the following statements does this paragraph support?

A People today do not recognize the significance of moral values.

B People today lack loyalty to others.

C Moral values are the foundation of religious practices.

D People today do not excel in their intentions, motives, actions, and relationships.

31. Dr. Smith: During the summer, we carry out a large-scale mosquito control program to protect the human population from Dengue virus. Along with spraying insecticides and larvicides to eliminate mosquitoes, we also collect and test dead birds for the virus. Since we haven't detected the virus in any birds tested this year, we believe there won't be an outbreak of Dengue virus in humans this summer.

Dr. Smith assumes which of the following in making the argument?

A Mosquitoes transmit the virus to birds by biting them, similar to how humans contract the virus, but birds are much more vulnerable to dying from Dengue virus.

B The massive spraying of insecticides and larvicides will be more effective this year than in previous years.

C Birds are the only species that indicate the presence of Dengue virus in humans.

D The insecticides and larvicides used to kill adult and larval mosquitoes do not harm the health of birds that consume mosquitoes.

32. A law against using mobile phones while driving is being considered. Drivers talking on mobile phones get distracted and can't focus fully on driving. Banning the use of mobile phones by drivers will make the roads safer.

The argument depends on assuming which one of the following?

A A sociologist's study has shown that mobile phones use sometimes contributes to traffic accidents.

B Drivers who hold their mobile phones in their hands are more distracted than drivers who use a hands-free headset or speakerphone while driving.

C Because drivers talking on mobile phones are distracted, they are more prone to get into accidents.

D Many drivers engage in behavior that distracts them from their driving, such as eating, adjusting the radio, reading maps, and talking on mobile phones.

33. A large university has changed its teaching methods. Previously, most introductory courses were taught by instructors without PhDs, but now all introductory classes will be taught by professors with PhDs. As a result, the average class size will rise from 50 students to 500 per class, but the overall learning experience for students is expected to improve.

Which one of the following is an assumption required by this argument?

A Having professors with PhDs teach all introductory classes will require the university to hire more faculty members with doctoral degrees.

B Major private universities have already adopted a system where professors with PhDs teach all introductory classes in large lecture formats.

C A class led by a PhD, even in a large lecture setting with hundreds of students, provides a better learning environment than a smaller class taught by an instructor without a PhD.

D College and university rankings often take into account the percentage of classes taught by PhDs when determining their ratings.

34. Florida has passed a law requiring car manufacturers to significantly reduce fossil-fuel emissions over the next five years, with stricter standards than the federal government. Seven other states on both coasts have also passed similar laws, and more states are planning to do so. Environmentalists support this law, asserting that these states' efforts will slow global warming.

Which one of the following is an assumption required by the environmentalists in making their assertion?

A Coastal states are more concerned about environmental issues.

B Reducing fossil-fuel emissions will slow global warming.

C Car manufacturers could have reduced emissions long ago but did not because the law did not force them to.

D Environmentalists have pressured car manufacturers to cut emissions.

35. Consumer review: This mail-order catalog claims that its customers save money by buying clothing through it, but the economy it promises is illusory because it only occasionally lowers its normal prices.

What assumption does the consumer review's argument rely on?

A Competitors of this catalog lower their normal prices more often and by larger amounts.

B This catalog is economical only when its normal prices are marked down more than occasionally.

C The catalog reduces its regular prices by smaller amounts compared to its competitors.

D Consumers should only buy by mail order when normal prices are discounted.

36. To boost production, FAT Company should adopt a flextime schedule, allowing employees some flexibility in choosing their work hours. Research indicates that working under flextime schedules is linked to increased employee morale.

The argument relies on the assumption that

A the employees who favor a flextime schedule are the most productive at FAT Company.

B an increase in the morale of FAT Company's employees could lead to increased production.

C flextime schedules are generally connected to lower rates of lateness and absenteeism.

D employees are most productive during the hours when all staff members are present.

37. Director: I've selected the famous British actress Lydia to play the lead role in my adaptation of the classic novel Les Misérables. I want her for her star appeal and emotional depth. The film will be in French, but since Lydia can't speak French, I'll let her speak her lines in English and then have a French actor dub them in French. The result will be a seamless French film with a famous actor to help sales.

Which one of the following is an assumption on which the director's argument depends?

A The other actors in the film may object to playing their scenes with a character who cannot speak their language.

B Lydia would feel uncomfortable working with a team that doesn't speak English.

C To increase sales, having a famous actor in the title role of a film is more important than having an actor who can speak the film's language.

D It would be too challenging to teach Lydia enough French to perform her lines accurately.

38. Manager: This museum does not allow people to use images of items from its collection in online publications. We must do everything possible to maintain the appeal of visiting our collection in person.

The manager's argument relies on the assumption that:

A Photographing art objects, especially with flash, can damage them by accelerating paint deterioration.

B The museum sells images of its collection in its gift shop, which is a crucial revenue source for the museum.

C The quality of most electronic images, particularly those online, does not meet the museum's professional standards.

D If people view online images of the collection, they will lose interest in experiencing it in person.

39. Dr. Lily: Many people think they can prevent acne by using clay masks to extract impurities from their pores and applying toner, believing it will close pores and keep dirt out. If this were accurate, treating acne with topical solutions would be quite simple. In reality, acne occurs beneath the skin and is influenced by internal factors like hormones and oil production. Therefore, relying on external treatments like masks and toners is ineffective.

The Dr. Lily's conclusion requires the assumption that:

A clay masks can dry out the skin

B some people enjoy the feeling of toners on their skin

C dirt on the skin does not cause acne

D doctors have effectively treated acne with oral antibiotics

40. Palmistry, which involves analyzing the shape, and lines of the hands to comprehend a person's current personality and forecast their future, is an unscientific practice. A study revealed that most claims made by palmists regarding the current financial situation of individuals in the sample were simply intelligent guesses.

Which one of the following is an assumption necessary to the argument?

A People with the same financial status typically do not share a similar personality.

B There is a consistent relationship between a person's personality and their financial status.

C There are many other methods for assessing an individual's personality that are more accurate than palmistry.

D The financial future is one of the primary issues that palmists focus on.

41. Approximately two million years ago, lava blocked a river in western Asia, leading to the formation of a small lake that lasted for about half a million years. Recently, bones of an early human ancestor were found in the ancient sediments at the lake's bottom, above the lava layer. This indicates that the ancestors of modern humans lived in western Asia between two million and one-and-a-half million years ago.

Which one of the following is an assumption required by the argument?

A There were no other lakes nearby before the lava dammed up the river.

B The lava beneath the lake-bottom sediments did not contain any human fossil remains.

C The lake was deep enough for someone to drown in it.

D The bones were already present in the sediments before the lake dried up.

42. The most prestigious and highest-paying law firms hire their new associates solely from top-ten law schools. Therefore, if a student is not accepted into a top-ten law school, they should not consider attending law school at all.

The argument's reasoning is particularly susceptible to criticism because it

A implies that attending a top-ten law school guarantees a job at a top-ranking law firm.

B does not address the biased hiring practices of top-ranking law firms.

C assumes that the only reason anyone would attend law school is to acquire a job at a top-ranking, high-paying law firm.

D misrepresents the connection between law school attendance and future job opportunities.

43. Mr. Thomas: Attorney John and Attorney Linda both wrote briefs arguing the same side of a case. Attorney John took 5 hours to write his brief, while Attorney Linda took 9 hours for hers.

Therefore, Attorney Linda's brief is better than Attorney John's brief.

The reasoning in the Mr. Thomas's argument is flawed because the argument:

A equates time spent on a job with quality, without examining the products to verify the quality

B criticizes Attorney Linda for spending too much time on her brief.

C does not clarify why Mr. Thomas thinks Attorney Linda's brief is better than Attorney John's.

D takes for granted that measuring the time spent on a task is the best way to ensure quality work

44. The stationery store near my house is having a sale where everything is 30% off. I intend to buy a lot of items because the more I spend, the more I'll save.

This argument is vulnerable to criticism for which of the following reasons?

A It assumes erroneously that the same discount of 30 percent will apply to all the items in the store.

B It fails to realize that buying discounted items is still spending money and may not actually lead to savings.

C It assumes that the store is offering a sale to attract more customers.

D It overlooks the possibility that items may be on sale due to poor quality, defects, or lack of popularity.

45. Doctor: Children whose mothers consume large amounts of alcohol during pregnancy often suffer from birth defects and intellectual disabilities due to prenatal alcohol exposure.

Therefore, pregnant women should completely avoid alcohol to prevent these serious issues in their children.

The reasoning in the argument is most vulnerable to criticism because the doctor:

A assumes that consuming any amount of alcohol during pregnancy will lead to birth defects and intellectual disabilities.

B presumes that the concern for newborn health takes precedence over the rights of pregnant women to make their own choices.

C does not provide evidence from credible medical sources to support the connection between heavy drinking and birth defects.

D suggests that pregnant women should be prevented from drinking during pregnancy.

46. Union member: Some members of our labor union are calling for an immediate strike. However, a strike would cut into our strike fund and incur a significant fine, leading to a considerable financial loss. Therefore, we should not strike at this time.

The union member's argument is most vulnerable to criticism because it

A does not consider that a strike could result in financial losses for the union even without a fine.

B fails to demonstrate that there will be a more favorable time to strike in the future.

C does not consider that the potential benefits of a strike might outweigh the costs.

D assumes that the union's financial strength is the most crucial factor in its bargaining position.

47. Forest fires can spread from the tops of young trees to the branches of older trees. When fires spread from treetop to treetop, they can be extremely destructive. However, in old-growth forests, the shade from mature trees prevents small trees from growing, and the lower branches of mature trees are too high to catch the flames.

This paragraph best supports the statement that:

A forest fire damage is reduced in old-growth forests.

B small trees should be removed to prevent forest fires.

C mature trees should be thinned out to prevent forest fires.

D forest fires cause the most destruction in old-growth forests.

48. Public parks are intended for use by all citizens equally. However, when organizations like schools or churches hold parties or other organized events, they bring a large number of people at one time. Therefore, there should be strict rules against large groups using public parks. The argument's reasoning is vulnerable to criticism because it takes for granted that

A individuals have complained about large groups using public parks.

B public parks are designed to accommodate organized groups.

C members of organized groups, like all other citizens, pay taxes that support public parks.

D the presence of large groups in a park hinders individuals from enjoying it.

49. Airline representative: We have reduced the number of award seats available to customers wanting to exchange 25,000 frequent-flier miles. However, we have greatly increased the number of flights where any seat can be exchanged for 50,000 miles, providing travelers with much more flexibility in scheduling. We believe customers will appreciate this change.

The reasoning in the airline representative's argument is most vulnerable to criticism on the grounds that the argument

A implies that customers with more frequent-flier miles deserve best access to seats than those with fewer frequent-flier miles

B criticizes customers who use frequent-flier miles to purchase seats for their inflexibility

C neglects to mention that airlines dislike awarding frequent-flier seats because they reduce their profit.

D assumes without offering evidence that customers value scheduling flexibility enough to pay double the frequent-flier miles for it.

50. Selena: I will not have my child vaccinated against common childhood diseases because I am worried about the side effects of the vaccines. Additionally, since other children are vaccinated, I believe my child is not at risk of contracting the diseases that these vaccines prevent.

A flaw in Selena's reasoning is that the argument

A criticizes parents who choose to vaccinate their children.

B attacks government officials who have insisted on a national vaccination program.

C implies that other parents lack knowledge about the side effects of vaccines.

D assumes that no other parents will share the same opposition to vaccination.

51. School board member: A school in a city and a school in a village received the same amount of funding but achieved very different outcomes. The city school had all its graduates attend college, while only 12 percent of the village school's graduates went on to college, with a 23 percent dropout rate before graduation. Clearly, the village school is wasting its money, while the city school is effectively utilizing its resources.

The reasoning in the school board member's argument is flawed because the argument

A incorrectly assumes a connection between funding levels and graduation rates.

B assumes that most students at the village school are unprepared for college.

C fails to consider that funding is not the only factor affecting school performance.

D unfairly blames the administrators of the village school for the failures of their students.

52. Bright Future Media Representative: Green Leaf Café started advertising with Bright Future Media at the beginning of last month and has seen a 31% increase in sales. This indicates that advertising with Bright Future Media can significantly enhance your company's sales. Each of the following statements, if true, would weaken the advertising representative's conclusion

EXCEPT:

A The Brew House, which also advertises with Bright Future Media, has never matched the monthly sales of Green Leaf Café.

B Bright Future Media only operates in a limited section of Rivertown.

C Last month included a popular food festival, which typically boosts café attendance.

D Alex, a renowned chef, began working at Green Leaf Café last month.

53. According to a report, over the past four years, the per capita income of Canadian workers in agriculture and related services has risen by 12 percent, while that of workers in other sectors has increased by 24 percent. As a result, workers in other sectors now have a higher per capita income than those in agriculture and related services.

The reasoning in this argument is questionable because it fails to exclude the possibility that

A four years ago, there were fewer Canadian workers in other sectors compared to those in agriculture and related services.

B four years ago, the per capita income of workers in other sectors was significantly lower than that of those in agriculture and related services.

C over the past four years, many workers who were previously in agriculture and related services moved to other sectors.

D the total national income generated by agriculture and related services is still greater than that produced by other sectors.

54. The parliamentarian has frequently argued that crimes affecting only a few individuals do not deserve the death penalty, which should only apply to the most serious offenses that threaten society's survival and well-being. When brutal crimes involving only one or two victims but generally viewed as deserving death penalty were brought up to counter the above argument, the parliamentarian justifies his stance by saying that if those crimes deserve death penalty, they cannot have impacted only a few individual victims.

The parliamentarian's reasoning contains which one of the following errors?

A It relies on the parliamentarian's authority in legal or sociological issues.

B It seeks to convince by emotion rather than logic.

C It attempts to support a viewpoint through an unrelated consideration.

D It assumes what it aims to prove.

55. City Mayor: Since the beginning of this year, air pollution has decreased significantly after we banned the use of fossil-fuel powered cars that were older than six years on city roads. Therefore, if we prohibit all fossil-fuel powered cars from operating on city roads, air pollution will be eliminated in the city.

The mayor's argument is flawed because it

A assumes that all cars in the city run on fossil fuels.

B depends on statistical claims that may not be reliable.

C does not consider that there could be other major sources of air pollution in the city.

D incorrectly reverses the relationship between cause and effect for the two phenomena.

56. Editorialist: Conservative lawmakers and religious organizations want to prohibit all research involving undifferentiated stem cells, fearing that it is similar to abortion since it would eliminate an embryo's chances at life. They could not be more wrong; stem cells are not embryos and cannot develop into human beings. Research on stem cells could lead to various promising treatments for diseases like Alzheimer's, diabetes, and certain cancers.

Which of the following best captures the overall conclusion of the editorialist's argument?

A Stem cell research should not be banned.

B Stem cell research would not lead to the destruction of embryos.

C Stem cell research offers many significant benefits.

D Some lawmakers are advocating for a ban on research involving undifferentiated cells.

57. A gram of refined cane sugar has the same calorie content as a gram of fructose, the natural sugar found in fruits and vegetables. Therefore, a piece of candy made with a specific amount of refined cane sugar has no more calories than a piece of fruit containing the same amount of fructose.

The reasoning in this argument is flawed because it:

A confuses one kind of sugar with another

B assumes that all candy contains similar amounts of sugar.

C presupposes what it sets out to establish, that fruit does not differ from sugar-based candy in the number of calories each contains

D fails to consider that sugar might not be the only source of calories in either candy or fruit.

58. City elections can be a challenging experience for all candidates. Voters review the candidates' backgrounds, and personalities to decide who is most qualified for office. Because they know they are being closely observed, candidates can feel very disheartened if they lose. Some may struggle to overcome the feeling of rejection that comes with losing the race. However, candidates should recognize that they are competing with equally qualified and worthy opponents. Recognizing the strength of the competition, candidates can avoid feeling disappointed when they do not succeed.

Which of the following is the main point of the passage?

A City elections should be determined by the quality of the candidates rather than personal opinions.

B City elections provide a chance for voters to select from multiple qualified candidates to find the best fit for governing their city.

C Experienced candidates understand that winning an election is challenging, and they do not feel disappointed if they lose.

D Elections are challenging periods for candidates, and losers should keep things in perspective when interpreting their losses.

59. Maria: Over the past year, biscuit sales, one of the cheapest food items, have dropped by over 5 percent in rural areas. This indicates that rural citizens are getting poorer and can't even afford basic food.

Dylan: That's not true. In the past year, 10 percent of the rural population has moved to urban areas for the long term.

Which one of the following is a point of disagreement between Maria and Dylan?

A Rural citizens are facing economic stress due to declining biscuit sales.

B Biscuit sales in rural areas have decreased because of lower rural incomes.

C The affordability of the cheapest food items in rural areas increases as more people move to urban areas.

D Migration from rural to urban areas negatively affects the poorest citizens in the country.

60. Tracy: We should encourage children to participate in a single team sport at a high level, ideally on a select traveling team that plays year-round. If a child isn't part of an elite team early on, he will miss the chance to join his high school varsity team and lose athletic scholarships for college.

William: Children should be encouraged to play a wide variety of sports. Sports teach children teamwork and leadership, promote physical development, and sports should be enjoyable. Children who specialize in one sport too early miss out on the chance to develop a wide range of skills, are more prone to injuries, and usually don't enjoy themselves as much as those who play a variety of sports. Additionally, with so few athletic scholarships available, it's not wise to rely on them.

Tracy and William disagree about whether:

A sports teach children teamwork and leadership.

B children who focus on one sport at an elite level find it enjoyable.

C parents should encourage their children to participate in organized sports.

D early specialization in a single sport is beneficial to children

4. Minh hoạ thuật ngữ (Matching definitions)

1. A blessing in disguise refers to a situation that initially seems bad but ultimately leads to something positive. Which situation below is the best example of a blessing in disguise?

A Alex loses his job unexpectedly but uses the opportunity to start his own successful business.

B Maria receives a low grade on an important exam, which makes her realize she needs to study harder for future tests.

C Jason gets stuck in traffic on his way to a meeting and arrives late, but ends up missing a car accident that happened just ahead.

D Lily finds out her favorite coffee shop has closed down, so she starts exploring new local cafes that she's never been to before.

2. Which of the following situations best exemplifies "indemnification", referring to the act of paying or promising to pay someone an amount of money if they suffer damage or loss.

A Tom signs a contract with a contractor to build a deck, including a clause that the contractor will cover any damages caused during construction.

B Emma makes a mistake in a report at work, which causes her team to miss an important deadline. She apologizes to her manager and promises to do extra work to help the team catch up.

C Jenna loans her friend money and asks for a written agreement outlining the repayment terms.

D John loses his wallet at the park and asks his friend to lend him money for the day. His friend agrees without expecting any compensation.

3. Question: Which of the following situations best exemplifies "reinstatement," where someone restores a situation or condition to its previous state after a loss or damage?

A Lucy accidentally deletes a colleague's important document and offers to help recreate it from memory, ensuring all details are accurate.

B Mark's apartment was damaged in a storm, and he hires a contractor to repair the roof and repaint the walls to restore it to its original condition.

C James loses his job and receives a sum of money from his employer, which helps him financially while he searches for new employment.

D Emma's laptop breaks, and she buys a new one to continue her work, but she does not attempt to recover any data from the old device.

4. Which of the following situations best exemplifies "integration," when people become part of a group or society and are accepted by them?

A John has a new team at work and makes sure everyone gets to know each other by organizing a team-building event where everyone shares their skills and interests.

B Lisa moves to a new country and learns the local language and customs to feel more at home and participate fully in the community.

C A neighborhood organizes a community event where people from different racial and cultural backgrounds are invited to share food, music, and stories.

D His company installs new software across all departments and trains employees to use it for improved communication.

5. Which of the following situations best exemplifies "speak of the devil," referring to the coincidence of someone appearing just as they are being talked about?

A Emily mentions her friend Rachel and, just as she does, Rachel walks into the café where they are meeting.

B Mark is discussing his plans for a vacation when his boss unexpectedly asks about his availability for that time.

C Lisa talks about her favorite movie, and a commercial for it comes on TV right after.

D Jake shares a funny story about a coworker, and moments later, that coworker enters the break room.

6. Which of the following situations best exemplifies "the last straw," where the last in a series of unpleasant events that finally makes you feel that you cannot continue to accept a bad situation?

A Anna had been putting up with her co-worker's constant lateness for weeks. She confronted him and asked him to take his job more seriously.

B Anna has been dealing with her noisy neighbors every weekend for months. One evening, they throw a loud party until 2 AM, and Anna decides to call the police to report the disturbance.

C Anna has been losing sleep because of her neighbor's barking dog for several weeks. One day, she ran into the dog's owner on the street and asked him to take action.

D Anna has been frustrated with her internet provider's poor service for months. After receiving another slow connection, she simply calls customer support to ask for a discount.

7. Which of the following situations best exemplifies "putting a spin on," where someone presents information in a way that makes it appear more favorable or positive?

A During a meeting, Mike reports that the project is behind schedule but emphasizes the innovative solutions his team is developing to overcome challenges.

B Jenna tells her friends that she didn't get the promotion because the company is restructuring, omitting her own performance issues.

C Tom shares his recent job loss with his family, focusing on the new opportunities it will bring rather than the stress it caused.

D Lisa says her favorite restaurant is closing and she highlights the exciting new places opening nearby instead of expressing her disappointment.

8. Which of the following situations best exemplifies "reconciliation," where two parties resolve a disagreement or restore a relationship after conflict?

A After a heated argument, Jack and Emily sit down together to talk through their differences and apologize to each other.

B Tom and his sister had a disagreement about a family event, but instead of talking about it, they simply avoided the issue and continued with their daily lives.

C Karen and her colleague disagree over how to approach a project. Karen decides to complete the project by herself, and they both avoid further conversation about it.

D After a minor misunderstanding, Peter quickly brushes it off and continues as if nothing happened so as not to aggravate the situation.

9. Which of the following situations best exemplifies "superstition," where someone believes in a mystical or irrational influence over events or outcomes?

A Emma avoids going under a ladder because she is afraid it will fall on her.

B Emma brings a family photo to a job interview because she thinks it will give her confidence, even though she is qualified for the position.

C Emma refuses to start a new project on a Friday because she believes that projects begun on that day are doomed to fail.

D Emma always wears a pink skirt to tennis matches because she looks good in pink, which helps her compete comfortably.

10. Which of the following situations best exemplifies the phrase "burn your bridges," meaning to irreparably damage a relationship or opportunity when leaving a situation?

A David finishes his contract and expresses appreciation to his employer for the opportunity, but he decides not to stay in touch.

B Jane leaves her current job to pursue another opportunity. She thanks her colleagues for their support and expresses interest in staying in touch.

C Mike decides to quit his job without giving any prior notice. In his resignation email, he criticizes the management and tells his coworkers they are better off without him.

D Laura left the company last month. Prior to her departure, she addressed the concerns she had observed regarding the company's internal issues with her manager.

11. Which of the following situations best exemplifies "foreclosure," where a lender seizes a property due to the owner's failure to fulfill loan obligations?

A Tom works with his financial advisor to restructure his debts, successfully avoiding any legal A action related to his property.

B Angela decides to sell her house at a discount to clear her outstanding debt and reduce her financial burden.

C David loses his job and has to sell his car to cover his living expenses, which he's been struggling to pay.

D Maria has fallen behind on her mortgage payments and receives a letter from her bank indicating that they may initiate proceedings to take possession of her home.

12. Applying for Seasonal Employment refers to when someone seeks a job that is tied to a specific season or time of year. Which of the following situations best illustrates Applying for Seasonal Employment?

A The ski instructors at the Evergreen School work from December through March.

B Henderson prefers jobs that allow him to work overseas.

C Anna arranges an interview with the beach resort hotel manager for the summer housekeeper position that was advertised in the newspaper.

D Denver's ice cream shop stays open until 12 p.m. during the summer months.

13. Erratic behavior refers to actions that are inconsistent, irregular, and lack uniformity. Which of the following situations best exemplifies erratic behavior?

A Jessica loses her temper every time the subject of local politics comes up in conversation.

B After learning about his layoff, Henry punches a hole in the door before leaving his manager's office.

C Rihana has gone to the dealership multiple times but still cannot decide on a car to purchase.

D Over the past month, Lincoln, who has been a reliable employee for four years, has frequently called in sick, forgotten important meetings, and been verbally aggressive towards coworkers.

14. A tiebreaker is a supplementary contest or extra play period intended to determine a winner among participants who are tied. Which of the following situations best illustrates a tiebreaker

A The score is tied at 30 at halftime.

B Henderson and Forden have both scored two goals during the game.

C The referee flips a coin to determine which team will start with the ball.

D The Tigers and the Eagles ended with 16 points each, and they are now competing in a five-minute overtime.

15. Power of Attorney refers to a legal document that gives an individual authority to act for another person in specified or all financial matters. Which of the following situations is the best example of the Power of Attorney?

A Lisa is looking to sell her house and hires a real estate agent to help with the process.

B After an accident, Jane's father is unable to visit the bank to deposit money and cash his cheques. He has completed some legal formalities to enable Jane to do such tasks for him.

C John's mother is elderly, so John thinks she is not able to make decisions, and he should make decisions on her behalf.

D Sarah helps her grandmother apply for a credit card, ensuring all the paperwork is correctly filled out.

16. Posthumous publication refers to the release of a book after the author's death. Which of the following scenarios best exemplifies posthumous publication?

A Michael passed away before he could read the initial reviews of his book.

B Thomas's publisher terminated his book contract because he didn't submit the manuscript on time.

C Linda never imagined she would see her novel in the trilogy published.

D Jessica is honored with an award for her writing career, and her son accepted the reward on behalf of his deceased mother.

17. Embellishing the Truth happens when someone adds false details or exaggerates facts in a story. Which of the following examples best demonstrates Embellishing the Truth?

A During his job interview, Tony, who has taught physics for ten years, describes himself as a highly experienced teacher.

B Cynthia attends a play and the following day tells her colleagues that she thought it was outstanding.

C The realtor refers to a house, located eleven blocks from the ocean, as a prime piece of waterfront property.

D The football coach states that only the most talented players will likely receive a college scholarship.

18. To enchant someone is to attract them strongly and make them feel very excited. Which of the following situations is the best example of enchanting?

A Lydia was watching a movie about a magician who mesmerized the audience with his magic tricks, leaving them in awe.

B After visiting the historic castle, many tourists felt a sense of indifference toward the local attractions.

C Maria found the script so captivating that she chose this film to make her return to the silver screen.

D The movie received mixed reviews, with some viewers expressing satisfaction with the plot.

19. Which of the following situations best exemplifies "ambiguity," referring to the state of having more than one possible meaning?

A During a meeting, Tom presents a proposal but does not elaborate on it, leaving the team unsure about the specific goals and expected outcomes.

B Lisa receives a text from her friend saying, "Let's meet later," but she is unsure whether her friend means later that day or sometime in the week.

C Mark reads an article about a new policy at work, but the explanation is filled with technical jargon that confuses him about what changes will actually occur.

D Sarah tells her colleagues that she is considering a career change but doesn't specify what field she is interested in, leading to various speculations about her intentions.

20. Exodus illustrates a situation in which many people leave a place at the same time. Which statement below can be an example of Exodus?

A A group of five people left the city early in the morning, traveling by bus and train to reach a nearby festival.

B The movie was so bad that many people left the theater at the interval.

C Everyone else hurried to the exits when the alarm sounded, except for one person who just watched quietly.

D We are currently in a transitional phase, awaiting the arrival of a new leader to guide us into a brighter future.

21. The phrase "A cat may look at a king" suggests that even those of lower status are not entirely restricted in their actions around those of higher status. Which of the following situations best illustrates this concept?

A A servant in the royal palace gazes at the king as he walks by, but is not allowed to speak or act in the presence of the king.

B Peter said, "You shouldn't stare at me like that. I'm your boss." John replied, "There's no such rule."

C Sometimes, you cannot achieve a goal by being too cautious and polite to your boss.

D During a family gathering, the child cried and screamed loudly when his older brother did not give him his toy.

5. Mệnh đề tương đương (Parallel reasoning)

1. Mr. Walker: I've discovered a new type of mollusk that lives in the deep ocean. All deep-sea creatures are predators, so this mollusk must be a predator as well.

Which of the following reasoning patterns is most similar to Mr. Walker's?

A A yoga enthusiast finds a new yoga studio. All yoga studios employ experienced and highly trained instructors, so the yoga enthusiast will find a good instructor.

B A coach discovers a talented new Spanish football player. Most Spanish players are tall and hardworking, so this player is likely tall and hardworking.

C A jeweler finds a perfect sapphire. All sapphires are hard and durable, so this sapphire must be hard and durable.

D A botanist finds a new cactus in the driest part of the desert. All desert plants are efficient at collecting and storing water, so this cactus must be as well.

2. Counselor: People should be selective about what they choose to argue or confront. By addressing only the issues that are truly important to them and ignoring the less significant ones, they improve their chances of achieving their goals while avoiding unnecessary conflict with family and friends.

Which one of the following best illustrates the counselor's advice?

A Tim and Lisa share a car. Tim never refuels the car, driving it until it's nearly empty, then waits for Lisa to fill it up. Lisa constantly complains every time she has to go to the gas station.

B A wife wants her husband to wash the dishes, take out the garbage, and make the bed each morning, but she knows he won't do all three. She dislikes taking out the garbage most, so she frequently asks him to do that and ignores the other tasks.

C An English teacher is teaching an IELTS course and wants to improve her students' scores in both reading and writing skills, but she lacks time to focus on both thoroughly. She decides to split her time equally between the two skills.

D A bride's mother wants a large wedding in a church with an extravagant reception, but the bride prefers a small, informal ceremony with only a few guests. Unable to agree, the bride and groom decide to elope.

3. Most video game players are male, so game makers should not create any games for women.

Which one of the following employs a flawed argumentative strategy that is most closely parallel to this flawed argumentative strategy?

A Most avid cyclists are male, so bicycle manufacturers should make most of their bike frames to fit men.

B Most Americans have cell phones, so they should stop using landline phones.

C Most people use Windows computers, so software producers should not bother to make any software for Macintosh computers.

D Most doctors wear glasses, so optometrists should aim some of their advertising at the doctors.

4. "An ounce of prevention is worth a pound of cure" means it is more cost-effective to prevent problems before they arise than to deal with them after they have occurred.

Which one of the following most closely conforms to this principle?

A Jacob spent hours preparing the soil for his lawn and garden, resulting in healthy, vibrant grass and flourishing flowers.

B A state school board required all students in public schools to provide proof of vaccination against measles before they could attend classes.

C A university that offered a low-cost online workshop on proper citation techniques for incoming students found it needed to allocate far fewer valuable staff hours to handle cases of unintentional plagiarism.

D Linda spent several months dieting and exercising to achieve her ideal weight and continued to monitor her diet and exercise regularly to prevent regaining the weight.

5. The recipe says to bake this pie for 40 minutes at 250 degrees. I can bake it in half the time if I double the temperature, so I am going to bake it for 20 minutes at 500 degrees.

Which one of the following is most closely parallel in its flawed reasoning to the flawed reasoning in this argument?

A The bottle of cough syrup says to take one teaspoon every four hours. My cough is really bad, so will take two teaspoons every four hours.

B The instructions on the dog food bag say to give a 10-pound dog 1 cup of food each day. My dog weighs 15 pounds, so I will give him 1.5 cups of food every day.

C My friend tells me to water her plants with 1 liter of water every day. I think that if I give them 2 liters every two days, I won't have to water them as often.

D The express bus is twice as fast as the regular bus but costs twice as much. Since I want to get to my destination quickly, I will pay twice the fare for the express bus.

6. Ready-made dinners are purchased frequently by most people who shop for groceries no more than three times a month. In Ambleside, most people shop for groceries no more than three times a month. Therefore, in Ambleside most people buy ready-made dinners frequently.

Which one of the following arguments has a flawed pattern of reasoning most like the flawed reasoning in the argument above?

A Most drivers in Bradford are safe drivers because there are very few driving accidents in Bradford and most accidents there are not serious.

B Thomas cannot drive because he doesn't own a car, and no one in his family who does not own a car can drive.

C It is clear that Michael's friend usually drives to school, since all of his friends can drive and all of his friends go to school.

D It is clear that most people in Yorkshire drive sedans, since most people who commute to work drive sedans and most people in Yorkshire commute to work.

7. Bullying bosses are common in the workplace. They often mistreat subordinates simply because they enjoy using power. Employees who are mistreated by their bosses usually continue performing their tasks as usual, rarely filing official complaints, and instead tend to express their frustrations in informal discussions with colleagues about their bosses' behavior.

Which of the following examples most effectively demonstrates this idea?

A Alan's boss made him stay late every afternoon to do work that he could have done earlier in the day if he had known about it. Alan tolerated this for a few months before ultimately accepting a job at a competitor.

B Boss Stella mocked employee Fiona's way of dressing, telling her that no one would take her seriously with her cheap clothes. Fiona reported Stella's comments to the human resources manager and was transferred to another department.

C Boss Will requires his employee, John, to work at the office a certain number of hours but frequently doesn't provide enough work for John to do. John comes into the office every day and pretends to work, complaining about Will to his secretary but not actually achieving much.

D Boss Wanda constantly criticizes Tim's work, making corrections one day and then correcting it back to its original state the next. Tim quietly accepts these criticisms but spends every Thursday evening at a bar with her coworkers, making fun of Wanda.

8. If Charlie commits to doing something on the condition that Mason carries out a certain task, and Mason fulfills that task, Charlie then has a duty to do whatever he promised to do.

Which of the following situations best illustrates this principle?

A Liam promised Linda that he would give her an engagement ring when he returned from military service. When he returned, he gave her the ring.

B A dog trainer rewards her dogs with food every time they perform their tricks correctly. The dogs perform well, and the trainer gives them food.

C A mother promised to take away her son's toy train if he misbehaved that day. The boy misbehaved, so she took away his toy train.

D A professor promised to give his student a good recommendation if she did well in the class. She performed poorly, so he wrote her a bad recommendation.

9. When riding a motorbike, motorcyclists are told to always wear a helmet. But helmets only protect the rider if they have an accident, and accidents only happen only once out of every 1,000 rides. Therefore, a motorcyclist would be perfectly safe if he wore his helmet only once out of every 1,000 rides.

Which one of the following employs a flawed argumentative strategy that is most closely parallel to the flawed argumentative strategy in this statement?

A My Japanese client calls once a week, always in the evening, after all the staff has gone home. I will be sure to get her message if I turn on the answering machine once a week.

B This sunscreen allows me to stay in the sun 15 times longer than I could without sunscreen. If I apply two coats of it, it will allow me to stay in the sun 30 times longer.

C The chances of winning a big prize in this raffle are 1,000 to 1. If I buy 1,000 tickets, I'm guaranteed to win a prize.

D The top language schools accept one out of every 20 applicants. Therefore, a person who wants to get into a top language school should apply to 20 of them.

10. The coach should have understood that appointing his son as the team captain was immoral.

Allowing a child to make decisions for the team simply because he is the coach's son is wrong.

Therefore, it is also wrong for a group of team members, which includes the coach's son, to make decisions for the team.

Which of the following contains reasoning that is flawed in the same way as is the reasoning in the argument?

A Actors should not be cast in movies just because they are attractive. People who are spontaneous should also be in movies, alongside those who are attractive.

B The coach's sons are the two team captains, and this situation is considered wrong because other people wanted to be captains too. Therefore, other individuals should be appointed as captains instead of the coach's sons.

CAnimals should not be treated badly simply because they are not human. In the same way, impoverished individuals in our society should not be treated as outsiders.

D The rich should not have exclusive control over political decisions just because of their wealth. Consequently, it is wrong to have any rich individuals in the governmental body that makes political decisions.

11. A popular fish oil is known to improve users' vision by 10%. Patients treated at a local eye clinic saw a 10% improvement in vision, so they all had to take fish oil.

Which of the following contains the same flawed reasoning as the passage above?

A Whaling has been determined to decrease the population of whales by 15% each year. The whale population has decreased by 15% this year, so whaling must be the main culprit.

B Weightlifting has been shown to boost individuals' performance by up to 15%. As the performance of a high school basketball team has improved by 15%, it must be because the players have started weightlifting.

C Injury typically reduces a joint's functionality by 15%. Given that John's joint is 15% less effective than it was previously, it must be that he has sustained an injury.

D Heart attacks strike 15% of people in their old age. Therefore, 15% of people in this nursing home will have a heart attack.

12. The country's citizens believe they live in a democracy. In presidential elections, though, citizens do not get to vote for president. Instead, they vote for electors who will cast their votes for president on behalf of the entire state. As a result, that country cannot truly be considered a democracy.

Which of the following shows a reasoning pattern most similar to the argument above?

A Most schools have student government, and all students have the right to vote in student government elections. However, very few students participate or show interest in these elections. Therefore, student government does not serve any meaningful purpose.

B Every city has local law enforcement agencies. Typically, city police handle urban crimes, the sheriff's department deals with county issues, and the state police handle state-wide matters. Therefore, there is a lot of unnecessary overlap in law enforcement duties.

C The USA is often described as having a free market economy. In fact, though, the U.S. economy is heavily regulated by the government, which benefits large corporations while punishes small companies and the self-employed. Therefore, the United States does not really have a free market economy.

D Most health insurance companies claim to offer their customers a range of healthcare options. However, doctors do not provide a price list for patients to review before receiving treatment, and patients in hospitals cannot choose their doctors. Therefore, health insurers are misleading in their claims.

13. Head teacher: Because teacher hiring freezes, the quality of education in that country will not improve. Thus, it will surely deteriorate.

The flawed reasoning in which one of the following is most similar to that in the head teacher's argument.

A Since there is a storm moving in, the outside temperature cannot rise this afternoon. Therefore, it must fall.

B William is a vegetarian, so he won't eat pepperoni pizza. He will eat cheese pizza instead.

C Given that over 250 years of attempts to prove the Goldbach theory have failed, it will probably never be proved. Hence, it is more likely to be disproved than proved.

D Since funding levels for social programs are being frozen, our society will not become more harmonious. Thus, it may become more discordant.

14. If Connor is not the most qualified candidate for sheriff, then Mason must be. Therefore, if the most qualified candidate is chosen and Connor is not selected, Mason will be.

The reasoning in which one of the following is most similar to the reasoning in the argument above?

A If the building contract isn't awarded to the lowest bidder, it will be given to Wilson. Therefore, if B&A receives the contract and Wilson does not, the contract must have been given to the lowest bidder.

B If Silva does not win the building contract, then Thomas will. So, if the contract goes to the lowest bidder and Thomas doesn't receive it, the contract must go to Silva.

C If the lowest bidder on the sanitation contract is not Seri, then it is Selena. So if the contract goes to the lowest bidder and it does not go to Seri, then it will go to Selena.

D If Alba is not the lowest bidder for the sanitation contract, then Joseph will be. So, if neither Joseph nor Alba gets the contract, the contract will not be awarded to the lowest bidder.

15. Every time a company cuts its prices, its competitors follow suit. Since Grab & Go has recently lowered the prices of its products, we can anticipate that its competitors will do the same soon. Which one of the following arguments is most similar in its reasoning to the argument above?

A Whenever a restaurant gives a discount, it attracts more customers. Since Bobby's restaurant has started offering a discount, we can expect an increase in its customer base.

B Whenever a politician makes a promise during an election, they often break it afterward. Since candidate A made a lot of promises during their campaign, it's likely they will break them.

C If a movie receives positive reviews, it usually performs well at the box office. Since the new movie has received outstanding reviews, it is expected to do well with critics.

D When it rains, people typically carry umbrellas. Since people are carrying umbrellas today, it must be raining.

16. The Feminist Group for Rights usually sees most of their suggested law reforms implemented within five years. Therefore, the reforms they suggest at today's convention will likely be implemented within five years. Which of the following reasoning patterns is most similar to the one above?

A Most Emmy Awards in the past three years have gone to crime web series. So, if most Emmy Awards next year go to web series, most of those will probably be crime web series.

B Most farmers in this region grow paddy. Therefore, paddy has probably been a staple food here for centuries.

C Most consumers of single-use plastics live in urban areas. Therefore, if someone doesn't consume single-use plastics, they probably don't live in an urban area.

D Most law school graduates find jobs at top twenty law firms. Therefore, most students from this year's class will likely find jobs at top twenty law firms.

17. Everyone who goes to law school is either very intelligent or very hardworking. Since Chandra is very intelligent, she must attend law school.

Which one of the following arguments contains flawed reasoning most similar to that in the argument above?

A All musicians are either creative or disciplined. Since Emily is a musician, she must be talented at guitar.

B Everyone working at the tech company is either an engineer or a designer. Since Sophia works at the tech company, she must be either an engineer or a designer.

C All professional athletes are either highly talented or exceptionally dedicated. Since Walcot is very talented, he must be a professional athlete.

D Anyone who plays chess is either strategic or analytical. Since Kyle is strategic, he must also be analytical.

18. There are certain dog-training methods that work well for most dogs, but each dog responds better to certain techniques that others may not be receptive to. So, the best approach is to use general principles for training while adapting to each dog's individual traits.

Which of the following propositions does this reasoning above most closely conform to?

A Even though general principles apply to most people or situations, there will always be exceptions that need special attention.

B Applying a general set of principles to unique individuals is risky because they may react differently to the same situation.

C While a general set of principles exist for achieving a goal, it is important to acknowledge the unique circumstances that may exist, and to take them into consideration.

D Despite differences among dogs, they are similar enough that a basic set of training principles can be used universally, with slight room for variation.

19. Economist: In order to maximize their revenue, all hamburger restaurants must offer fries and drinks. Since The Burger Shack is a hamburger restaurant and it offers fries and drinks, its revenue is clearly being maximized.

The flawed reasoning in which one of the following is most similar to that in the economist's argument?

A To succeed, every guitar teacher needs a clear teaching plan and a patient personality. Samantha has both of these, so she is certainly successful.

B Every piano teacher needs to have a clear course of instruction and a patient personality to succeed. Beverly, a piano teacher, has both of these, so she is undoubtedly successful.

C Snow only happens when the temperature is below 2 degrees and there is sufficient humidity. On Friday, there was sufficient humidity, but the temperature was 2 degrees, so it didn't snow.

D A video game must have both a memorable character and lots of action to be successful. Tetris is selling well, so it must have both a memorable character and plenty of action.

20. If a wine gets a high score from the National Sommelier Association, it is more likely to be sold in fine-dining restaurants. A new Oregon wine just received a high score from the National Sommelier Association. So, it's more likely to be sold in fine-dining restaurants.

Which of the following reasoning patterns is most similar to the one above?

A Brighter colors attract more attention. The professor attracts a lot of attention. Therefore, he probably wears more bright colors.

B Pearls that are larger than average are more likely to retail for a higher price. A pearl diver found a dozen pearls that are much larger than average. Therefore, these pearls are more likely to retail for a higher price.

C Older coins are more valuable. Myra has a coin believed to be from the colonial era, but lacks any proof. Therefore, it's questionable whether her coin is valuable.

D Famous actors tend to appear in popular movies. Popular movies often have famous actors. Therefore, it is unlikely to find a popular movie without famous actors.

21. The student at this university takes courses across a wide variety of disciplines. Elizabeth is a student at this university, so she must be taking courses in a wide variety of disciplines.

Which of the following arguments contains flawed reasoning that is most similar to the reasoning in the argument above?

A The students at this school study mathematics. Since Miguel is a student at this school, he must be studying mathematics.

B The editorial board of this law journal has written about many legal issues. Since Laura is on the editorial board, she has written about many legal issues.

C The parts of bulldozers are heavy. Since this machine is a bulldozer, it must be heavy.

D Older cars need frequent oil changes. Since this car is new, its oil doesn't need to be changed as often.
