Read the following passage about and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Each year, several organisations publish a list of world cities with the best quality of life. The organisations look at various factors to make **their** lists: a stable government, little crime, and good public transportation. Cities with a good quality of life are also usually close to nature, have attractive buildings, access to museums, nice weather, and a clean environment.

For residents of these cities, life is generally great. However, even the best cities have some **issues**. In addition, approximately half of the world's population lives in cities with a lower quality of life. **These people may dream of migrating somewhere better, but this may not be possible.** A more feasible

alternative is for these people to find a way to improve the quality of life in their own communities.

Erik Ahlström provides a good example of this kind of personal action. Several years ago, he moved to Stockholm, the capital of Sweden. In general, Stockholm has an excellent quality of life. However, Ahlström felt that there was too much trash on the city streets. He decided to start "plogging," picking up the trash while jogging. He called this new activity plogging, and soon other people were helping him. However, it has become so popular that people now go plogging in communities all over the world.

Mary Clear and Pam Warhurst are also good examples. They live in Todmorden, a small town in northern England. They found some areas of land nobody was using and began growing vegetables, fruit, and herbs. Their idea was that local residents could pick and eat them. People from other places soon heard about this "incredible edible" **initiative** and wanted to know more. Todmorden now has so many visitors that residents there joke that they have invented a new form of tourism called vegetable tourism.

[I] The world of work is undergoing significant transformations as robots gradually replace manual jobs traditionally held by semi-skilled workers. [II] AI assistants, like holograms, have been tested at airports such as Changi and Boston, impressing users with their efficiency as check-in staff. [III] In South Korea, some restaurants have adopted tablets for self-ordering and utilized maid robots instead of human waitstaff. [IV]

Upon leaving school, 18-year-olds face one of the most significant decisions of their lives: choosing a career path. This choice requires thoughtful consideration and an understanding of one's own strengths and Interests. Support from school counselors and parents, along with insights gained from personality assessments, can empower students to make informed career decisions. In a rapidly evolving world, it is crucial for school-leavers to be prepared for change and seize unique opportunities that arise.

While navigating career choices can be daunting, it marks just the beginning of an individual's professional journey. Continuous self-improvement is essential for career advancement. Individuals must set clear goals, build confidence, enhance communication skills, and expand their professional networks.

Graduation from university signifies more than the end of formal education; It represents a commitment to lifelong learning and development.

In this ever-changing landscape, flexibility is a vital quality. It encompasses professional agility, problem-solving abilities, change management, and innovative thinking. Those who remain open-minded and adaptable will find it easier to accomplish tasks successfully. Although AI has started to replace some blue-collar positions, it cannot replicate the emotional intelligence required in fields that demand human connection. While machines can deliver lectures or perform surgeries with precision, they lack the ability to comfort and support patients in a way that a compassionate nurse can. As technology continues to reshape our world, school-leavers must cultivate the right skills to meet societal demands.
