Question 11:

- a. Last but not least, they frequently collaborate with colleagues to share ideas to improve teaching methods.
- b. Teaching is a rewarding and fulfilling profession that has a lasting impact on students' lives and futures.
- c. Ultimately, teaching plays a vital role in shaping future generations and inspiring a passion for lifelong learning.
- d. Teachers carefully design lessons that help students understand the lessons and encourage their critical thinking.
- e. In addition to their teaching duties, they build strong relationships with students, offering support and guidance both inside and outside the classroom.

- A.** b-d-e-a-c **B.** b-e-c-a-d **C.** c-a-e-d-b **D.** c-d-a-e-b

Read passages about education and training and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions.

Vocational education and training (VET) plays a **crucial** role in preparing individuals for specific careers. Unlike traditional academic education, which focuses on theory and general knowledge, VET emphasizes practical skills and hands-on experience. This type of education is designed to equip students with the technical abilities **they** need to succeed in industries such as healthcare, construction, information technology, and hospitality.

[I] One of the key benefits of vocational education is that it provides direct pathways to employment. [II] Many VET programs are developed in partnership with industry experts to ensure that graduates possess the skills which employers are looking for. [III] In some cases, VET programs include apprenticeships, allowing learners to gain work experience while earning a salary. [IV]

Vocational training also offers flexibility. Programs are available at different levels, from short courses to advanced diplomas, allowing individuals to choose a program that suits their career goals. Some people enter VET directly after high school, while others may pursue vocational training later to change careers

or improve their skills. This flexibility makes vocational education accessible to a wide range of learners.

In addition to practical skills, VET emphasizes the development of soft skills like communication, teamwork, and problem-solving. These skills are essential in today's job market, where employers value both technical knowledge and the ability to work effectively with others. **By combining technical and interpersonal skills, VET graduates are well-prepared for the demands of the modern workplace.**

As technology continues to evolve, vocational education must adapt to **keep up with** industry changes. New programs are emerging in fields such as renewable energy, cybersecurity, and advanced manufacturing. This ensures that VET remains relevant and meets the needs of the economy.

Overall, vocational education and training provide a practical and effective way to gain the skills required for various careers. It offers opportunities for lifelong learning and career advancement, helping individuals succeed in an ever-changing world of work.

Question 12: The word "**crucial**" in paragraph 1 could be best replaced by _____.

- A. social B. essential C. minor D. secondary

Question 13: The word "**they**" in paragraph 1 refers to _____.

- A. specific careers B. students C. technical abilities D. practical skills

Question 14: Where in paragraph 2 does the following sentence best fit?

As a result, students often find job opportunities quickly after completing their training.

- A. [I] B. [III] C. [II] D. [IV]

Question 15: According to paragraph 2, which of the following is NOT mentioned as an advantage of vocational education?

- A. ensuring necessary skills for graduates B. helping learners gain work experience
C. offering direct routes to jobs. D. developing industry experts

Question 16: Which of the following best summarises paragraph 3?

- A. People can register for vocational education immediately after they finish their high school.
B. All vocational programs are short-term courses which are designed to help people find jobs quickly.
C. Vocational training is flexible and accessible with many program levels for different career goals.
D. Vocational education is only flexible and available for students who do not plan to attend university

Question 17: Which of the following best paraphrases the underlined sentence in paragraph 4?

- A. VET graduates are ready for modern jobs as they learn both technical and social skills.
B. VET students focus on technical skills and therefore they develop interpersonal abilities.
C. Interpersonal skills are more important than technical knowledge in vocational education.
D. Modern workplaces do not require a combination of technical and soft skills to succeed.

Question 18: Which of the following can be inferred from the passage?

- A. Vocational training is only suitable for those who want to enter the workforce immediately.
B. Traditional education helps students develop practical skills for employment.
C. Vocational education programs are limited to fields like construction and hospitality.
D. VET adapts to industry trends to ensure graduates have relevant job skills.

Question 19: The phrase **keep up with** in paragraph 3 is OPPOSITE in meaning to _____.

- A. fall behind B. draw back C. slow down D. go down

Question 20: Which of the following is TRUE according to the passage?

- A. People must complete an apprenticeship after they can finish a vocational training program.
B. Vocational education does not need to adapt to technological advancements in the industry.
C. Vocational education helps students develop both practical and soft skills for future careers.
D. Vocational training is only useful for those who want to work in construction and healthcare.

Question 21: Which of the following best summarises the passage?

- A. VET equips learners with practical skills, flexibility, and industry relevance for career success.
- B. Vocational education is only for students who do not perform well in traditional academic settings.
- C. VET provides hands-on training but lacks the flexibility needed for career advancement.
- D. Traditional education is more valuable than vocational training in preparing individuals for work.

Read the following passage about food and the environment and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions.

Humans have traditionally eaten both meat and vegetables, but meat consumption has increased dramatically. According to the United Nations' Food and Agriculture Organization (FAO), global meat demand has risen by over 500 percent in the past 50 years. This growth is driven by a rapidly increasing population and rising incomes, which leads to higher meat consumption. With the global population expected to reach nine billion by 2050 and developing countries becoming wealthier, the demand for meat is unlikely to slow down.

Increasing meat production to meet this demand could be **detrimental** to the environment. Currently, 30 percent of Earth's land surface and 70 percent of agricultural land are used for raising livestock. Every year, more land is cleared to meet the rising demand, contributing to deforestation. FAO reports indicate that meat production is responsible for 70 percent of the Amazon deforestation in South America. Large factory farms consume significant amounts of energy and produce heavy pollution. It is clear that our current meat consumption and production methods are not sustainable in the long term.

In response to these challenges, food scientists are **exploring** new ways to produce meat. Dutch researchers are developing lab-grown meat by using cow cells to create "muscle" tissue. This method could reduce the energy and land required for raising cattle by about 40 percent. Meanwhile, scientists in the United States and China are working on creating natural "meaty" flavors from mushrooms to enhance plant-based foods. **They** believe that natural flavors are healthier and more acceptable to consumers.

Although lab-grown meat is still in development, large-scale production remains a decade away due to high costs. The Dutch team is spending over \$200,000 to produce enough meat for one burger. While many people are not yet ready to accept lab-grown meat, it may become a necessity in the future.

(Adapted from Active)

Question 22: Which of the following is NOT mentioned as the reason for the increase in meat demand?

- A. nutrient-rich meat
- B. increasing population.
- C. countries becoming wealthier
- D. rising incomes

Question 23: The word "**detrimental**" in paragraph 2 is OPPOSITE in meaning to _____.

- A. negative
- B. harmful
- C. stable
- D. useful

Question 24: The word "**exploring**" in paragraph 3 could be best replaced by _____.

- A. attending
- B. producing
- C. studying
- D. confirming

Question 25: The word "**They**" in paragraph 3 refers to _____.

- A. mushrooms
- B. scientists
- C. consumers
- D. flavors

Question 26: Which of the following best paraphrases the underlined sentence in paragraph 4?

- A. Despite being in development, lab-grown meat will take about ten years for large-scale production as it is expensive.
- B. Lab-grown meat will be developed despite being expensive, but large-scale production may happen in about ten years.
- C. Lab-grown meat is produced on a large scale now, but the process of production remains expensive.
- D. In spite of the fact that the costs are high, lab-grown meat will likely be mass-produced in ten years to come.

Question 27: Which of the following is TRUE according to the passage?

- A. Forest destruction is the only result of the raising animals for meat
- B. Scientists in the United States are producing meat from mushrooms.
- C. Chinese food scientists are creating artificial meat without raising cows
- D. The producing meat methods now are not helpful to the environment.

Question 28: In which paragraph does the writer mention the consequences of the rise in meat production?

- A. Paragraph 2 B. Paragraph 1 C. Paragraph 4 D. Paragraph 3

Question 29: In which paragraph does the writer mention a prediction on a possible future method of producing meat?

- A. Paragraph 2 B. Paragraph 3 C. Paragraph 1 D. Paragraph 4

Read the following biography and mark the letter A, B, C and D on your answer sheet to indicate the option that best fits each of the numbered blanks.

Professor Tran Dai Nghia: A Key Figure in Vietnam's Development

Professor Tran Dai Nghia was an important Vietnamese scientist and (30) _____. Born on October 15, 1913, in Quang Tri Province, he is best known (31) _____ his work in military engineering. During the Vietnam War, he (32) _____ develop the country's first homemade weapons and military equipment. His inventions, like improved artillery and rockets, (33) _____ an important part in Vietnam's fight for independence.

In addition to his work in defense, Professor Tran Dai Nghia was a dedicated teacher. He trained many young engineers and scientists (34) _____ later supported to build Vietnam's future.
