I have had nothing but trouble with the computer I have now. It often shuts down without warning, and sometimes I can't _access_ my files. I haven't been able to figure out the reason for these problems, and no one has been able to fix it for me.

I plan to go to some stores this Saturday and Sunday to search for my new computer. Would you be able to go with me? If not, I'll call you before the weekend to get your advice.
